

Theme Generator

The goal of this feature is to make it easier to make a custom theme without special training and special software. All point & click, in the browser.

Brosho CSSÂ Assistant

New in Tiki6.

Brosho is a jQuery plugin which helps you edit your CSS, directly in the browser.

<http://demos.usejquery.com/brosho-plugin/>

Visit *tiki-admin.php?page=look* and pick "Custom CSS" tab.

1. Activate CSS Assistant
2. Mouse-over and click the item (ex.: image, text, menu, etc.) you want to style
3. Enter CSS (ex.: background: yellow;) and you will see the result in real time.
4. Click "Copy" to Copy to Custom CSS
 - Custom CSS overrides CSS (that's the **Cascading** part!)

Drag & drop layoutÂ builder

New in Tiki7.

All elements in the site layout (logo, login box, site title, etc.) are now positioned via drag & drop.

To use, visit *tiki-admin_modules.php*

Background info: Modules Revamp

Color, Borders and TypographyÂ picker

New in Tiki7.

Colors: Foreground Colors, Background Colors

Borders: Border Colors, Border Widths, Border Styles, Border Radii

Typography: Font Sizes, Line Heights

This simple interface will let you override CSS.

Visit <tiki-admin.php?page=look> and pick "Theme Generator" tab.
