# Tiki Manager Package

Starting in Tiki25, Tiki Manager can be added as a Package to any Tiki instance. It has many uses, including Automatic updates. This replaces the standalone Tiki Manager Web UI with something more robust and flexible.

Command Line

2022-04-15 14:33:30

When the Tiki Manager Package is installed, these commands appear in php tiki-console.php

```
gallery
  gallery:migrate                        Migrate images from the Image Gallery to the File Gallery
goal
  goal:check                             Reviews all active goals and assigns rewards.
index
  index:catch-up                         Catch-up on incremental indexing.

  index:optimize                         Optimize the unified search index
  index:rebuild                          Fully rebuild the unified search index
installer
  installer:lock                         Disable the installer
list
  list:execute                           Performs Plugin ListExecute command on a particular page
mail-in
  mail-in:poll                           Read the mail-in messages
mail-queue
  mail-queue:send                        Send the messages stored in the Mail Queue
manager
  manager:backups:delete                 Delete backups folder
  manager:cache:clear                    Clears application's cache
  manager:database:delete                Delete database
  manager:database:view                  Vew database
  manager:instance:access                Remote access to instance
  manager:instance:backup                Backup instance
  manager:instance:blank                 Creates a new blank instance
  manager:instance:check                 Check instance
  manager:instance:clone                 Clone instance
  manager:instance:cloneandupgrade       Clone and upgrade instance
  manager:instance:console               Run Tiki console commands
  manager:instance:copysshkey            Copy SSH key
  manager:instance:create                Creates a new instance (or take over an already installed Tiki)
  manager:instance:delete                Delete instance connection
  manager:instance:detect                Detect Tiki branch or tag
  manager:instance:edit                  Edit instance
  manager:instance:fixpermissions        Fix permission on a Tiki instance
  manager:instance:import                Import instance
  manager:instance:list                  List instances
  manager:instance:maintenance           instances under maintenance
  manager:instance:patch:apply           Apply a patch of Tiki source or 3rd party vendor source to an instance
  manager:instance:patch:delete          Delete a patch applied to an instance
  manager:instance:patch:list            List patches applied to an instance
  manager:instance:profile:apply         Apply profile to instance
  manager:instance:restore               Restore a blank installation
  manager:instance:revert                Revert instance state
  manager:instance:setup-scheduler-cron  Setup instance's scheduler cron
  manager:instance:stats                 Fetch data (ex: KPIs) from instances.
  manager:instance:update                Update instance
  manager:instance:upgrade               Upgrade instance
  manager:instance:verify                Verify instance
  manager:instance:watch                 Perform an hash check
  manager:logs:clear                     Clear logs folder
  manager:manager:check                  Check Tiki Manager requirements
  manager:manager:info                   Show Tiki Manager Info
  manager:manager:report                 Manage reports
  manager:manager:reset                  Reset Tiki Manager
  manager:manager:setup-backups          [backups:setup] Set-up a cronjob to perform instance backups
  manager:manager:setup-clone            [setup:clone] Setup a cronjob to perform instance clone
  manager:manager:setup-update           Setup automatic instance updates
  manager:manager:setup-watch            Set-up cron job to perform hash checks
  manager:manager:update                 Update Tiki Manager
  manager:tiki:versions                  List Tiki versions
  manager:webmanager:block               Block webmanager login related process
  manager:webmanager:enable              Activate Tiki Manager web administration
ml
  ml:train                               Train a particular machine learning model
multitiki
  multitiki:list                         List MultiTikis in a path
  multitiki:move                         Moves a MultiTiki site from one tiki instance to another
notification
  notification:digest                    Send out email notification digests
```

Web Interface

As of 2022-07-05, this is functional in trunk, but for more interactivity and reliability, we will add support for Realtime.

Back-end admin panel

ee the Tiki Manager link in the admin menu (tiki-ajax_services.php?controller=manager&action=index). This is the fu
back-end interface

Tracker field

Tiki Manager Tracker Field is for when you want to have meta data associated to your instances, or if you want to launch Tiki instances from Tracker items.

Wiki Plugins

- PluginTikiManager is for when you want to present a simple user interface, with a subset of functionality.
- PluginTikiManagerClone
- PluginTikiManagerUpdate

Virtualmin

- If you connect to a Virtualmin instance, you get even more features: https://wikisuite.org/Tiki-Manager-Package-connecting-to-Virtualmin

Development
