

Tiki Manager Tracker Field

new in Tiki25, this tracker field permits to use the Tiki Manager Package from a tracker. The typical use case is to track a list of Tiki-powered sites, with additional information about these instances. This is similar to Show.t.o Tracker Field, but more generic. See also: PluginTikiManager and development ideas: Tiki Manager within Tiki.

Source code:

- <https://gitlab.com/tikiwiki/tiki/-/blob/master/lib/core/Tracker/Field/TikiManager.php>
- <https://gitlab.com/tikiwiki/tiki/-/blob/master/templates/trackerinput/tikimanager.tpl>

It should be possible to use along with Realtime.
