User Mentions

This feature converts any wiki syntax written as `@username` in all text areas to the existing actual Registered user link. In order to *mention* users on Wiki pages etc. a Tiki admin needs to enable "Tagging users" preference under *User Features >* *User Account Features* on the **User Settings** (tiki-admin.php?page=user) control panel first.

EXAMPLES

EXAMPLE 1

This code:

@luci

Would produce on this site:
@luciash d' being Ã°ŸÂ§™
