Overview

Use this tab to configure which page listings are available and which fields appear when listing wiki pages.

To Access

From the Administer Wiki page, click the **Page Listings** tab.

Note

After enabling specific page listing types, be sure to adjust the group permissions, as necessary.

Option	Description	Default
Latest changes	Enable users (with permission) to see the sortable, searchable list of wiki pages (tiki-lastchanges.php) organized by last-updated date. Use the Configuration area to specify which items to display..	Enabled
