The introduction text portion is useful for forming definition type indention like Example 1 below. However the introduction text can be eliminated by simply including ;: together followed by the text as shown in Example 2. ^Example 1: ~np~;Intro Text: First example of indented text produces:

Intro Text
Indented text

Example 2:
;:2nd example of indented text

2nd example of indented text^

USING SQUARE BRACKETS

f you wish to include square brackets in your text (i.e. as regular text and not a link) simply add an additional open bracket to start
E.g.

[[this would not be a link]

Would render like this...

[this would not be a link]

NON-BREAKING SPACE

Use ~hs~~ to add the HTML " " for a non-breaking space.

Entering code

You enter code blocks by enclosing the block between `CODE()` and `CODE` tags (you need to put curly braces around the tags). Note
this is a smarty construct, not a Wiki syntax.

- The Color Picker II is located at http://www.pagetutor.com/pagetutor/makapage/picker/
- WebDevlopper extension for Mozilla Firefox
- The wiki syntax is not standardised accross applications. There is an initiative to publish the Wiki Syntax as an RFC from the IETF. See RFCWiki
