

# Windows Azure

## Create a website

The screenshot shows the Windows Azure portal interface. At the top, there is a dark header with the text "Windows Azure" and a dropdown arrow. Below the header, a sidebar on the left contains four categories: "WEB SITES" (0), "VIRTUAL MACHINES" (0), "MOBILE SERVICES" (0), and "CLOUD SERVICES" (0). The "WEB SITES" category is highlighted in blue. The main content area displays "web sites" with a "PREVIEW" tag. Below this, a message reads "You have no web sites. Create one to get started!". At the bottom of the main content area, there is a button labeled "CREATE A WEB SITE" with a right-pointing arrow icon.

CREATE A WEB SITE →

# Pick "Custom Create"

The screenshot shows the Windows Azure portal interface. At the top, there is a dark header with the Windows logo and the text "Windows Azure" followed by a dropdown arrow. Below this, the "WEB SITES" section is visible, with a globe icon and the text "WEB SITES 0". The main content area is a dark grid of service categories. The "WEB SITE" category is highlighted with a white border and the word "PREVIEW" in green. Within this category, the "CUSTOM CREATE" option is selected, also with a white border. Other options in the "WEB SITE" category include "QUICK CREATE", "FROM GALLERY", and "MOBILE SERVICE" (marked as "PREVIEW"). To the right of the grid, there are two input fields: "URL" (empty) and "REGION" (containing "North Central US").

# Indicate source for the code

Pick Github You should fork <https://github.com/lphuberdeau/tiki-azure> and use this.

# Authenticate with GitHub

and pick repo

The screenshot shows a dialog box with a dark header bar containing an information icon and the text "The authorization was successful." Below the header, the main content area is titled "Choose a repository to deploy". It features two input fields: "REPOSITORY NAME" with a dropdown menu showing "tiki-azure" and "BRANCH TO DEPLOY" with a text input field containing "master". At the bottom left, there are three numbered steps: "1", "2", and "3", with "2" being the active step. At the bottom right, there are two circular buttons: a back arrow and a checkmark.

The authorization was successful.

The screenshot shows the Windows Azure portal interface. At the top, the text 'Windows Azure' is visible. The main content area is for a resource named 'mytikitest' in a 'PREVIEW' state. A navigation menu includes 'DASHBOARD', 'DEPLOYMENTS', 'MONITOR', 'CONFIGURE', 'SCALE', and 'LINKED RESOURCES'. A prominent error message states: 'DEPLOYMENT FAILED: Thursday, June 13, 2013 11:37 AM'. Below this, it says 'Fetch from https://github.com/marclaporte/tiki-azure' and provides details: 'ID: temp-b9bcc', 'AUTHOR: N/A', and 'DEPLOYED BY: GitHub'. A 'GITHUB http' link is also present. At the bottom of the error message, it says 'Not Modified: Thursday, June 13, 2013 11:46 AM'. The bottom navigation bar contains icons for '+ NEW', 'BROWSE', 'SYNC', and 'DISMISS'.
