

Wizards

Starting in Tiki12, some wizards were added to Tiki to help in the initial setup based on configuration templates like "Macros" (**Profiles Wizard**), as well as further site configuration (**Admin Wizard**), to help you while upgrading your tiki site to see what's new (**Changes Wizard**), and to help you as site admin to collect more information from your users if you need it (**Users Wizard**).

You can mouse over the icons with a question mark in those wizards to know more about the features and preferences that are new for you.  Example:

The screenshot shows the Tiki Setup page. At the top left is the Tiki logo and "wiki cms groupware". At the top right is a "Log out" link and a "You are admin login" notification with "Start the Wizard" and "Close" buttons. The main heading is "Tiki Setup". Below it is a "Get Started" section with a green checkmark and text: "Congratulations! You now have a working instance of Tiki 21.3vcs. You may start using it right away, or you may configure it to better meet your needs, using one of the configuration helpers below." A blue tip box is overlaid on the page, containing the text: "Tip: Mouse over the icons to know more about the features and preferences that are new for you. Example: ". Below the tip box, three wizard options are listed: "Configuration Profiles Wizard" (with a yellow button "Start Configuration Profiles Wizard (Macros)"), "Configuration Wizard" (with a blue button "Start Configuration Wizard"), and "Changes Wizard" (with a green button "Start Changes Wizard"). Below these are sections for "Control Panels" (with a blue button "Go to the Control Panels") and "Server Fitness" (with a red button "Go to the Tiki Server Compatibility Check"). At the bottom right of the page is a "Start the Wizard" button and a "Close" button.
