

Wizards

Starting in [Tiki12](#), some wizards were added to Tiki to help in the initial setup based on configuration templates like "Macros" (**Profiles Wizard**), as well as further site configuration (**Admin Wizard**), to help you while upgrading your tiki site to see what's new (**Changes Wizard**), and to help you as site admin to collect more information from your users if you need it (**Users Wizard**).

Tip

You can mouse over the icons with a question mark in those wizards to know more about the features and preferences that are new for you.  Example:

Tiki Setup

Get Started

✓ Congratulations! You now have a working instance of Tiki 21.3vcs. You may [start using it right away](#), or you may configure it to better meet your needs, using one of the configuration helpers below.

Tip
Mouse over the icons to know more about the features and preferences that are new for you. Example

Configuration Profiles Wizard

You may start by applying some of our configuration templates through the **Configuration Profiles Wizard**. They are like the **Macros** from many computer languages. It is best to apply them from the start and you can always preview and reverse the process.

[Start Configuration Profiles Wizard \(Macros\)](#)

Configuration Wizard

Alternatively, you may use the **Configuration Wizard**. This will guide you through the most common preference settings in order to customize your site. You will easily be able to configure options like: languages, date and time, user login, theme, website title and logo, etc.

[Start Configuration Wizard](#)

Changes Wizard

Or you may use the **Changes Wizard**. This will guide you through the most common new settings and informations in order to upgrade your site.

[Start Changes Wizard](#)

Control Panels

Use the **Control Panels** to manually browse through the full list of preferences. From the main administration page you'll be able to configure your Tiki, to enable features not set on by default and to change settings. To Avoid Getting Overwhelmed by the impressive number of settings as a StartUp Tiki Admin we set a preferences filters for **Basic** and **Advanced** features to start with.

[Go to the Control Panels](#)

Server Fitness

You can check if your server meets the requirements for running Tiki version 21.3vcs. Using our home made standalone script for server environment settings diagnostics you can check that everything is ready to run your Tiki properly. It is very useful for any PHP app, as it checks over 50 different things and provides contextual feedback.
