

# Wysiwyg Editor Admin

Since [Tiki2](#), Tiki includes a Wysiwyg (*What You See Is What You Get*) editor:  , through the integration of [Fckeditor](#) in the Wiki feature. Since [Tiki6](#), this wysiwyg mode is powered by CKeditor, the new version family of the same engine.

It can be enabled at Admin -> General panel.

Please note that WYSIWYG doesn't work with [Edit by Section](#).

# Description of Wysiwyg Editor Features

---

Wysiwyg Editor is optional:

... and is displayed by default:

If disabled, the normal editor will not be available anymore.

If checked, it will be the default editor when creating or modifying a wiki page.

"Content is parsed like a wiki page"

means all content of the wiki page is parsed, then bold is shown as bold in parsed result, and is still displayed bold in the source of the wiki page. Then you can mix wysiwyg edition and wikistyle code.

"Content is partially parsed"

partial parsing includes:

- \* parsing of links
- \* parsing of images and generally what is included in { }
- \* parsing of wikiplugins

# Toolbar skin:

It selects the theme styles for icons, colors, etc. used by Wysiwyg editor

## Toolbar content:

Shows a list of features that will be loaded with the editor. For more information on these features, check the FCKEditor Documentation at <http://www.fckeditor.net/>
