Le menu des articles

En tant qu'utilisateur, il s'agit d'un simple menu. Vous pouvez visiter la page d'accueil des articles, voir une liste d'articles, voir les notations, soumettre un article ou voir les soumissions courantes. Bien entendu, ce que vous pouvez et ne pouvez pas voir dans ce menu est configurable.

Si vous êtes admin, cliquez sur le lien "Modifier l'article" dans le menu d'admin pour créer un nouvel article.

Ã©dition ou soumission d'articles

Ceci est l'Ã©cran oÃ¹ vous pouvez Ã©diter un article existant ou crÃ©er un nouvel article, nous allons examiner chaque champs en dÃ©tail :

The screenshot shows a web form for editing or submitting an article. The form is divided into several sections:

- Title:** A text input field.
- Author Name:** A text input field containing "John Lewis".
- Topic:** A dropdown menu set to "None".
- Type:** A dropdown menu set to "Article".
- Own Image:** A text input field with a "Browse..." button.
- Use own image:** A checkbox that is unchecked.
- Own image size x:** A text input field containing "0".
- Own image size y:** A text input field containing "0".
- Apply template:** A dropdown menu set to "none".
- Categorize:** A dropdown menu with options "[show categories | hide categories]".
- Heading:** A large text area.
- Quicklinks:** A toolbar with icons for text formatting (bold, italic, underline, link, unlink, list, ordered list, indent, outdent, undo, redo) and a "B" icon.
- Body:** A large text area with the instruction "Use ...page... to separate pages in a multi-page article".
- Publish Date:** A date selector showing "December 15, 2003 at 09:40".
- Expiration Date:** A date selector showing "December 14, 2004 at 18:00".
- Allow HTML:** A checked checkbox.
- Buttons:** "preview" and "save" buttons.

Note~hs~: La capture d'Ã©cran ci-dessous est pÃ©rimÃ©e et ne montre pas tous les Ã©lÃ©ments listÃ©s ci-dessous.

- **En-tÃªte** - Un genre d'"amuse-gueule" au-dessus du titre de l'article (texte de petite taille).
- **Titre** - Le titre de l'article
- **Sous-titre** - Information en plus du titre
- **Source (url)** - Si c'est appropriÃ© ou utile, un lien de rÃ©fÃ©rence, peut Ãªtre

spÃ©cifiÃ©. Ceci s'affiche Ã la fin de l'article.

- **Author Name** - Le nom de l'auteur tel qu'il apparaÃtra dans l'article (vous pouvez utiliser n'importe quel nom ici).
- **Topic** - The topic to which the article is assigned. If you don't see options in the select box for topics then you must first create a topic. Use the admin topics link in the admin menu to create a topic and then go back to the edit article screen.
- **Type** is the type of article to use (ie, Article, Review, etc.).
- **Rating** - This only shows up for Review articles. Assign a numerical rating to whatever you are reviewing.
- **Own Image** - Articles can have an associated image. If you want your article to have an associated image you can upload an image using the Own Image field. If the article has no image but the topic has an image the article will be displayed with the topic image
- **Use own image** - By default the article will display the topic image (each topic has an image), if you want the article to display its own image instead of the topic image, check the Use own image checkbox.
- **Float text around image** - Select this to have text wrap around the image. The image will be on the left side with text starting to the right of it if there is room. If this is not selected the text will begin under the image. In the example below, the first image is floated, the second is not. The same behavior applies in view mode or list mode.

- **Own image size x** and **Own image size y** - Allows you to adjust the display size of the article image. Specifying only an "x" size will scale the image with a similar vertical/horizontal ratio.
- **List mode image width** - allows you to display the image in a different scale when viewing a list of articles in a smaller scale and when viewing the article. (tiki>=6.0)
- **Apply template** - To use this, you must have the "Use templates" box checked in the CMS admin page. Any templates created in the Content template section with the "use in cms:" box checked will show up in this drop down list.
- **Categorize** - Assign categories for this article.
- **Heading** - The heading isn't a heading in a typographical sense, but rather is the opening paragraph(s) of text. On the main articles page and when articles are displayed with the Articles plugin, the article heading text displays and is followed by the "Read more" link if the article also has a body section.
- **Body** - This is the main section of text that becomes available when the "Read more" link is followed (and also when the URL is for the article itself). In both the article heading and body, you can use the wiki syntax, plugins, etc. the same as when editing a wiki page. If you want to use HTML in the article make sure that the AllowHTML option is checked at the bottom.

- **Publish/Event Date** - Set the publishing date for the article. This affects when the article is visible on the Articles Home page.
- **Allow HTML** - Check this box to allow HTML content in the heading or body.
- **Folksonomy Tags** - Also known as Freetags or Tags, one or more of these can be entered for free-from categorization.

Finally, use the **preview** function as many times as you want to preview and edit the article. Make sure you click save before navigating away from the page.

Articles Home

The Articles Home displays the articles most recently added to the Tiki. system. The number of articles displayed on Articles Home can be configured from the General Admin CMS admin page. Articles Home can be set up as the Tiki Home Page from the admin screen if you want to use Tiki as a CMS system.

The screenshot shows the TikiWiki 1.8 - Polaris CMS interface. The page title is "TikiWiki 1.8 - Polaris - cms experimental website. You may experience some broken features, migration is in progress." The date and time are "Mon, 15 Dec, 2003 [14:26 UTC]".

The main content area displays two articles:

- Unexpected 1.7.5 to be released!**
By: Damian Parker on: Mon 15 Dec, 2003 [11:50 UTC] (41 reads)
A unplanned 1.7.5 has been drawn up for the 1.7 TikiWiki release family. This is only a bugfix release and will not contain any new features.
ANNOUNCE (398 bytes) no comments
- Second release candidate of Tiki 1.8 -Polaris-**
By: Oliver Hertel on: Sat 22 Nov, 2003 [15:10 UTC] (3096 reads)
RC2: Second release candidate of Tiki 1.8 -Polaris-
(500 bytes) 2 comments

The sidebar on the left contains a "Getting Started" section with links for Download, Install, Troubleshooting, and Documentation. Below that is a search bar for Wiki PageName. Further down are links for About TikiWiki, More info, Development, TikiWiki Demo, Tiki Community, and TikiWiki website. At the bottom of the sidebar is a "Menu" section with links for Home, Contact us, Stats, and Categories.

On the right side, there is a "Login" form with fields for user and password, a "login" button, and a "Remember me" checkbox. Below the login form is a "Search" section with a search bar and a "go" button. At the bottom right, there is a "Last changes" section listing recent updates:

- 1) TikiWikiInterna...
- 2) ReleaseProcess175
- 3) UserPageColorado
- 4) teste
- 5) TeamCommunit...

You will see each article displayed showing the heading and a link to read more where you can read the whole article

You can also filter the list of articles shown here by:

- type (article, review)
- topic (numeric id)
- find (a string to search for in the title, heading or body)

For example, you could make a Wiki link to a page showing only "reviews" with this:

[tiki-view_articles.php?type=review]

or, only articles with the word "Tiki" in them with:

[tiki-view_articles.php?type=article&find=Tiki]

You can also change the sort order from the default (newest to oldest) with the "sort_mode" option. For example, to list upcoming events in order of occurrence, use:

tiki-view_articles.php?sort_mode=publishDate_asc&type=Event

List Articles

The list articles section shows a list of articles.

Title	Type	Topic	PublishDate	ExpireDate	Visible	AuthorName	Reads	Size	Img	Action

Submit Article

Submitting an article is the same as editing an article with the difference that the result will be stored as a submission and not published immediately as an article. The process to edit and send a submission is the same as editing and article so you should read about editing above articles if you haven't to find out.

View Submissions

You will view a list of submissions and if you have the permissions you may see links to edit, remove or approve a submission. Once a submission is approved it becomes an article.
