

Test Page

Ignore this, just a page for testing.

Test Sunday 25 August, 2024 06:13:37 UTC

I don't ignore pages Ã°ÿŠ

Just another testing line...

This will break this page:

The screenshot shows a web browser window with the URL `demo.tiki.org/9x/tiki-edit_report.php`. The page is titled "Report Builder" and contains several configuration options:

- Report Type: Tracker
- Tracker: Time sheet - 4 (with a "Join Tracker" button)
- Start, End, Item Id: (empty input fields)
- Search: Summary - 12 (with a "for" dropdown and a "+" button)
- Status: (with sub-options o, p, c)
- Fields: Summary - 12, Associated project - 13, Description - 14, Amount of time spent - 15, Done by - 16
- Limit: (empty input field)

Below the configuration panel are three buttons: "Preview", "Wiki Data", and "Export As CSV". A modal window titled "Wiki Data Output For REPORT Plugin" is open, displaying the following code:

```
{REPORT()}
;type : Tracker
;tracker_value : 4
;tracker_search_0_value : 12
;tracker_status_0_value : o
;tracker_status_1_value : p
;tracker_status_2_value : c
;tracker_fields_0_value : 12
;tracker_fields_1_value : 13
;tracker_fields_2_value : 14
;tracker_fields_3_value : 15
;tracker_fields_4_value : 16
{REPORT}
```

At the bottom of the page is a table with the following data:

	A	B	C	D	E
1	Summary - 12	Associated project ...	Description - 14	Amount of time sp...	Done by - 16
2	Watch TV		Taking it easy 	5	
3

```

... will show this video

FOR TIKI 7

- 28 may - jb here testing saving ajax errors
- Maybe try without having done a preview...
- what else could it be? 3 saves and no error (in Firefox 4.0.1)
- trying the click on save directly thing... seemed fine
- maybe if you edit for ages?
 - I bet it only happens when you really don't want it to...
 - trying with pop-up preview...
 - Seems the auto save timer is broken ã°ÿ~'
- Wonder if that magnify icon to open/close the preview pane is the right icon?
 - Probably not...
- I also wonder if there are any docs about this *new* preview thing?

Have to go out now, will try more later.

PREVIOUSLY ON TIKI 6

- In Safari if you make a change and then click directly on the save button you sometimes get an alert about an undefined and irrelevant AJAX error.
 - Fixed (as far as i can tell)
