To use in Tiki7, you must activate and setup feature_file_galleries_batch (visit tiki-batch_upload_files.php to make sure all is OK) (no longer needed in Tiki8)

In Tiki7 or Tik8, you need to have the permission tiki_p_upload_files and visit the file gallery.

Starting in Tiki 7.1, you can start a drawing by putting {draw} in a wiki page. When viewing the page, it will ask you where to store the newly created drawing.

Starting in Tiki8, when editing a drawing using [PluginDraw](#), when saved, the old version is moved to the archive (if feature is turned on). But this won't work if you edit from the File Gallery or if you are re-using that same Drawing in another wiki page. Perhaps better to use [PluginInclude](#) in this case...

Demo of screencapture and drawing

Videos

The SVG-edit has changed since the videos were made, but it still gives you a great overview.

[Introduction to SVG-edit](#)

[SVG-edit 2.3: New Features](#)

[SVG-Edit 2.4: Part 1 of 2](#)

[SVG-Edit 2.4: Part 2 of 2](#)

Use cases

Annotating images

For example, designer's Proofs or Mockups: Similar to [PluginAnnotation](#) (a simpler image annotation feature), it would be nice to pick an image from the system and start it in draw mode, where we can add captions. So the image would be the background in SVG-Edit

Drawing charts

I want to draw a diagram of some sort (ex.: org chart)

Try it out at <http://demo.tiki.org/> (You'll likely need to activate the feature)
