Adding Fields to a Tracker

To make a Tracker useful and usable, you add some fields to it to capture the data you want to collect. You can administer fields by going to the the Trackers list, and clicking the Fields Action.

To add a field, click the Fields action from the Trackers list, then fill in the form that appears indicating the field name, field type, and any applicable options. Some of field types:

- Text input
- Textarea input
- Drop down combo (enter options separated by commas)
- Checkbox ("boolean" on/off yes/no true/false fields)
- Date/time field
-

At least one of the fields in your Tracker must be the "main" field, which links to the item's details from the Tracker listing. This attribute is controlled by the "Column links to edit/view item?" checkbox. You can also indicate if the field is visible or not in the Tracker item list using the "Is column visible when listing tracker items?" checkbox. If a Tracker has a lot of fields you may want to use this checkbox to remove some of them from the item listing, for easier viewing.

Some Tracker field types have options you can set. For example, the drop-down field's items are entered separated by commas. In this graphic, you can see this Tracker will track movie reviewers' ratings using a drop-down field, with five "star" rating entries: *,**,***,****,*****. It is easy to think of various creative uses for this powerful tool - problem severity or impact levels, task priority, status, or a client's credit rating.

Note in this graphic the "is main" column. A "y" or yes, means you have checked the "Column links to edit/view item?" checkbox. The list also indicates whether a field will be visible in the item listing, and allows you to edit or remove fields accordingly using this list's Actions.

Hint: One default field in any tracker is the "Status" field, which tracks whether an item is open or closed. This field is *not* visible in the Fields listing.

Using Trackers

You can view a list of your Trackers by clicking Trackers from the menu. The center panel will change as such:

Trackers

Clicking on a Tracker's name (here, Movie Reviews) will take you to a screen in which you can add, modify, delete, filter and sort items, and, toggle email monitoring on changes to the Tracker.

Adding a Tracker Item

To add an item into your Tracker, enter the information into the fields on the form at the top of the screen, and click Save when you are finished:

Assigning Items to Specific Tiki Users or Groups

If you set up your Tracker with fields of type "user selector" or "group selector," you will be able to easily select from a drop-down list the users or groups registered on your Tiki site. First, we must change the Reviewer field in our Movie Review Tracker to be of type "user selector".

Tracker Items are always added with their built-in status field set to "open." Items with "open" status, which have been assigned to either your user account or your group, will be displayed in your My Tiki screen.

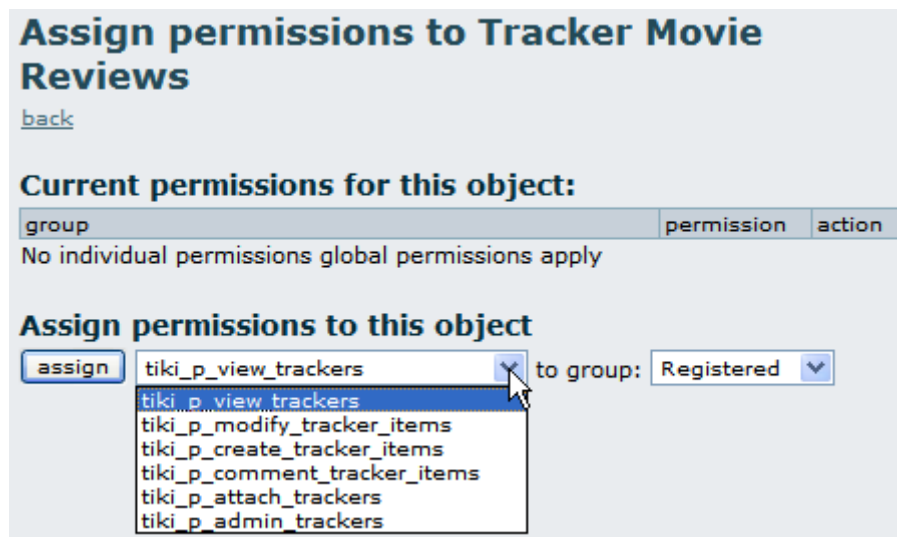

Monitoring Tracker Items

In the details screen, users can choose to monitor a Tracker, so that an email is sent by Tiki to the user, whenever the item is modified. Click the "Monitor" button to toggle monitoring off and on.

Setting Tracker Permissions

Permissions can be set to control access to Trackers. Note that you can set permissions globally or on a per-Tracker level. Assign permissions by clicking the "perms" link from the Tracker listing in the Tracker admin screen.
