

Hotwords

Hotwords (Hotwords) are words that are automatically added to the search index. They are used to improve the search results for specific terms. The words are added to the index when they are first used in a post or comment. The words are then indexed and used to search for posts and comments. The words are also used to generate tags for posts and comments.

- Add a new hotword: [Add Hotword](#)
- Edit a hotword: [Edit Hotword](#) (URL: `tiki-admin_hotwords.php`)
