

Action Calendar

The Action [calendar](#) is a [module](#) which shows system events in a cronological order. Also known as the Tools Calendar

Please add this page to the [refactor](#) list. The feature has changed substantially and the graphics no longer show what the user will experience. Especially the 2nd one.

Event Listing

Once you have the calendar active you can click on a day to see the listing of events for that day. (sorry for the slightly chopped up screenshot)

The screenshot shows the 'Tiki Action Calendar' interface. At the top, there are navigation buttons: 'Do not group by item', 'Filter', and 'List View'. Below these are icons for different calendar views (Day, Week, Month) and navigation links: '< Day', '< Week', '< Month', 'Day >', 'Week >', and 'Month >'. The 'Focus:' is set to 'Tuesday 11 of November, 2008'. A navigation bar shows '« November 11 »'. The main content area is a table with columns 'Hours' and 'Events'. The 'Events' column shows a list of actions for the day, including updates to wiki pages like 'Learning' and 'Teaching (x2)' by user 'Joanne' at various times (16:29, 16:25, 16:26).
