

Using Calendars

The *calendar* is a feature-rich resource to help track site modifications as well as organize, and collaborate with individuals & groups around the world using the user-friendly architecture of Tiki. Tiki's [Calendar](#) feature makes use of practically all of the features you might find in other web calendars, while also fully integrating the other features of TikiWiki such as categories, wikis, blogs, galleries, and many others!

Depending on how the Tiki administrator has configured the Tiki site you're using, you may be able to do some or all of the following:

- View a list of all available calendars on your Tiki site
- View a calendar
- Create a calendar
- Add a new event to a calendar
- Edit or delete a calendar event
- Print a calendar

The following sections explain how to perform these actions.

Navigating the Calendar

The navigation bar

- Viewing ___ date
- Today's date (jump to today in calendar)
- Zoom Level/Views

Calendar Navigation Bar

The Mini-Navigation Calendar

- ?
- x / clicking anywhere outside the mini-nav calendar
- >
- Today
- Week #
- Selecting the date you wish to view

If you click on the focus date, and [Js Calendar](#) is enabled, then a pop up graphical navigator will show up. See [Js Calendar](#) for more details.

Advanced usage

Example of advanced usage in a wiki page through the plugin module and several modules inside:

Which could be produced with something similar to:

```
{SPLIT()}{MODULE(module=calendar_new, viewmode=month, notitle=y) /}  
---  
{MODULE(module=calendar_new, viewmode=month, month_delta=+1, notitle=y) /}  
---  
{MODULE(module=calendar_new, viewmode=month, month_delta=+2, notitle=y) /}  
{SPLIT}  
{MODULE(module=upcoming_events, viewmode=month, notitle=y) /}
```
