

## Background on Siteground

Siteground.com is a typical Fantastico host and one of the [Tiki friendly hosts](#) so it is used as an example for this documentation. All other Fantastico hosts will be very similar. Shared hosting provides mainly an inexpensive, easy hosting service for low traffic wikis. Their customer service is very good, and their interface is user friendly, but their servers are heavily loaded and sometimes tiki [performance](#) is kinda slow. Overall a good bet for a starter wiki host.

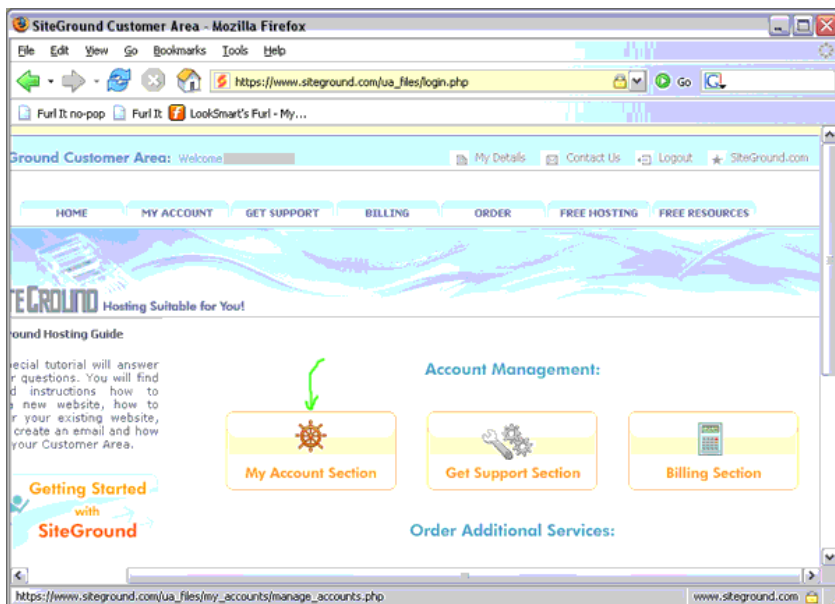

- Includes CPanel and Fantastico - includes installation through fantastico and webanalysis and other tools through cpanel

## Installation

After securing an account and choosing a domain name, installation is straightforward. Installation is either [install by FTP](#), or with Fantastico with siteground you cannot use [SSH](#).

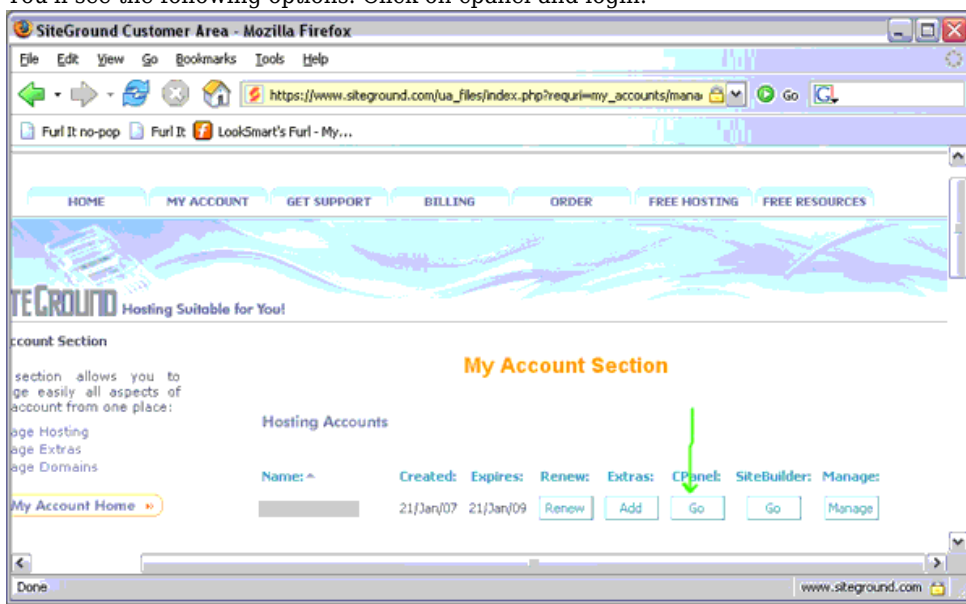

## Manage Your Account.

Cpanel is a utility that allows you to manage your site without knowing unix or programming. To find cpanel, login, and click as shown below.

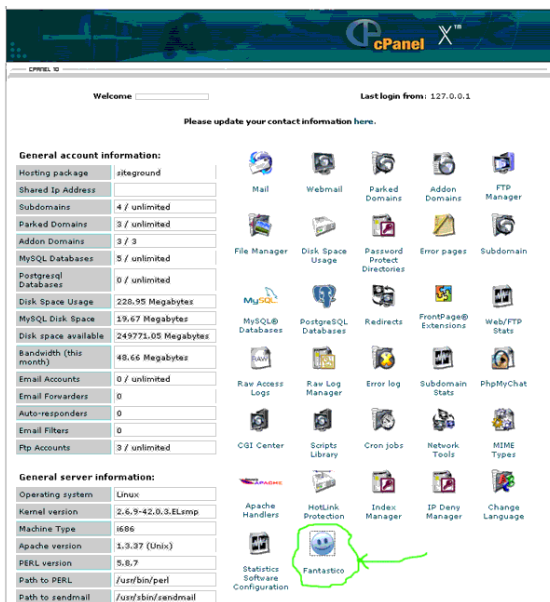

## Access CPanel

You'll see the following options. Click on cpanel and login.

## Access Fantastico

When CPanel comes up, ignore most of it for now. Click on Fantastico at the bottom.

## Install Tiki

Fantastico is a installer. You'll use it to install Tiki. Once fantastico comes up, click on Tiki Wiki CMS Groupware.

### Project Management

- dotProject
- PHPProjekt

### Site Builders

- Pro Edition
- Templates Express

### Wiki

- TikiWiki
- PhpWiki

### Other Scripts

- Dew-NewPHPLinks
- Moodle
- Noahs Classifieds
- Open-Realty
- phpAdsNew
- PHPauction
- phpFormGenerator
- WebCalendar

Then, select new installation. Notice for example that Tiki has been installed on karateforge.com. This same tool is used for future upgrades and remembers past installations.

## TikiWiki

**Short description:** TikiWiki is designed to be an international, clean and extensible Content Management System and Groupware that can be used to create all sorts of web applications, sites, portals, intranets and extranets. TikiWiki also works great as a web-based collaboration tool. TikiWiki has a lot of native options and sections that you can enable/disable as you need them.

**Homepage:** <http://www.tikiwiki.org/>

### TikiWiki support forum

(We are not associated with the support forum)

### New Installation (1.9.7)

Disk space required: 42,96 MB

Disk space available: 249770,5 MB

### Current installations:

	<a href="#">Visit site</a> <a href="#">Remove</a>
<a href="#">karateforge.com/</a> (1.9.7)	<a href="#">Visit site</a> <a href="#">Remove</a>
	<a href="#">Visit site</a> <a href="#">Remove</a>
	<a href="#">Visit site</a> <a href="#">Remove</a> <a href="#">Upgrade to 1.9.7</a>

Choose your domain to install. Then click install. Notice that the administrator login is set as admin with password admin.

## TikiWiki

### Install TikiWiki (1/3)

#### Installation location

Install on domain

#### Install in directory

Leave empty to install in the root directory of the domain (access example: <http://domain/>).

Enter only the directory name to install in a directory (for <http://domain/name/> enter **name** only). This directory SHOULD NOT exist, it will be automatically created!

#### Admin access data

Administrator-username   
(you need this to enter the protected admin area)

Password (you need this to enter the protected admin area)

You can change the admin login/password later in the administration area of your TikiWiki installation.

If all goes well, you'll see something similar to the following, and can click "finish".

## TikiWiki

### Install TikiWiki (2/3)

The MySQL database and MySQL user  will be created and used for this installation.

- You chose to install in the main directory of the domain [how2why4..com](#).
- The access URL will be: .com/">http://how2why4..com/.

Click on **Finish installation** to continue.

## Change Admin Password

Immediately after fantastico installation, change the admin password before someone else does. Go to your site and login:

Login

user:

pass:

login

Use the admin login and admin password. The system will force you to change the password as follows.

Change password enforced

User:

admin

Old password:

xxxxxx

New password:

xxxxxx

Again please:

xxxxxx

change

## Installation Complete

Tiki is installed and you're set up as the administrator.

Alias
