

Improve Tracker Forms

You can improve tracker forms enabling an experimental jquery user interface library called "**Chosen**"

Enable the feature

You can enable the feature in:

Admin home > Features > Interface (tab) > jQuery plugins and add-ons > Experimental > jQuery-ui Chosen Menu

Remember that you need to have your "Preference Filters" in the admin panel with the "Advanced" and "Experimental" options enabled in order to see this feature checkbox.

Drop downs

You can choose a value from a dropdown box by selecting the items in the list through scrolling down, as usual, or you can nowadays filter the list values based on the text you type at the top.

The screenshot shows a form with several fields. The 'Subject' field is at the top, followed by a text input for 'Importance' with a dropdown menu open. The dropdown menu lists values from 1 to 9, with '4' selected. Below the dropdown is a text input for 'Easy to solve?' with a dropdown menu open. The dropdown menu lists values from 1 to 9, with '4' selected. Below the dropdown is a text input for 'Feature' with two tags: 'g' and 'Article'. Below the text input is a text input for 'Category' with two tags: 'Regression' and 'Bug: Usability'. Below the text input are two checkboxes: '10.x' and '11.x'.

Multiple selection

Similarly, a section to allow multiple selection of items can be shown in a small but enhanced dropdown box, which allows the user to select one or many of the options, remove them from the list in the text field at the top:

The screenshot shows a form with several fields. The 'Easy to solve?' field is at the top, followed by a text input for 'Feature' with two tags: 'Accounting' and 'Article'. Below the text input is a text input for 'Category' with two tags: 'Bug: Regression' and 'Bug: Usability'. Below the text input is a dropdown menu with a list of options: 'Blocker', 'Bug: conflict of two features (each works well independently)', 'Bug: Consistency', 'Bug: Error', 'Bug: Security', 'Community projects', 'Documentation (or Advocacy)', 'Dogfood on a *.tiki.org site', 'Feature request', and 'Incident'. Below the dropdown menu are two checkboxes: '8.x' and '9.x'.

Click to expand

Filtering displayed options by typed text

Additionally, you can also filter the values displayed in the dropdown so that only those matching your typed text are shown in the list (only the ones starting with "D" in the example below: Documentation and Dogfood a *.tiki.org site).

The screenshot shows a filter interface with the following elements:

- Easy to solve?**: A dropdown menu with the value '5' selected.
- Feature**: A text input field containing 'Accounting' and 'Article' as tags.
- Category ***: A dropdown menu with a search input containing 'D'. The dropdown list is open, showing two filtered options: 'Documentation (or Advocacy)' and 'Dogfood on a *.tiki.org site'. A mouse cursor is pointing at the second option.
- Tiki Version**: Two radio buttons labeled '10.x' and '11.x', both of which are unselected.
