

Mobile

All Tiki based sites have the ability to be browsable through on mobile phones or PDA pocket based browsers.

Since Tiki19

Since [Tiki19](#), Tiki is using the [Bootstrap 4](#) mobile-first front-end framework.

Since Tiki13

Since [Tiki13](#), Tiki is using the [Bootstrap 3](#) mobile-first front-end framework.

Since Tiki7

Starting in Tiki7, the mobile version is powered by [jQuery Mobile](#) and [MobileESP](#).

Apply the [Mobile profile](#) to use. This profile will create a minimal perspective that will allow you then to use a special home page, menus etc just for mobile. All features of Tiki (login, etc.) are expected to work well over time.

Then go to the site on a mobile device and it automatically (should) kick in (i.e. it switches to the mobile perspective and mobile theme which adds the jquery.mobile libraries & css).

Alternatively, you can click the "**switch to mobile**" link on the mobile module the profile adds for you.

How to enable/disable mobile mode

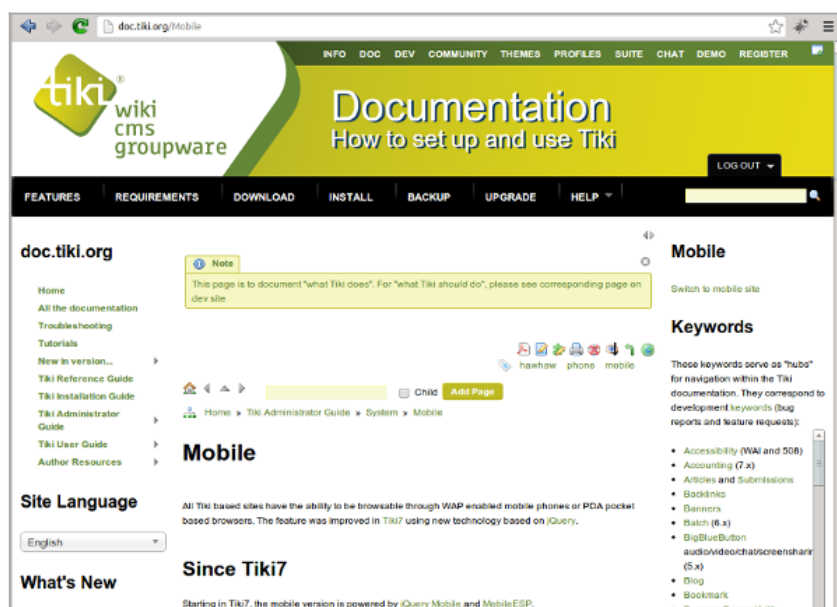

Tiki will automatically change the display mode to mobile when a mobile device is detected. You can in addition change to mobile mode or return to standard display mode manually with the side module for Mobile (created automatically when you apply the Profile Mobile to your Tiki site).

Module in a side column

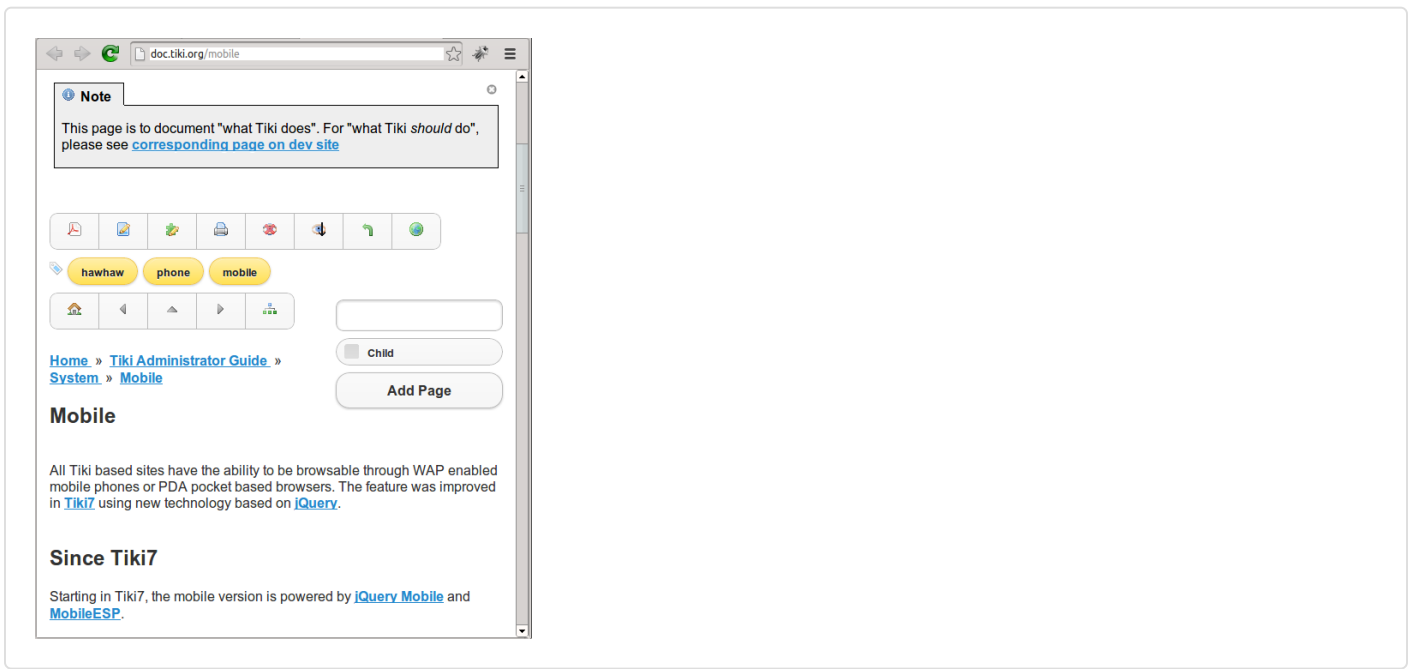

Improved in Tiki12

Mobile mode display has been extensively improved in [Tiki12](#). See as an example this page Mobile displayed in standard mode:

Click to expand

And the same page displayed for mobile devices:

Since Tiki 1.7

Starting in Tiki 1.7, this is thanks to the power of the HAWHAW library. This is currently limited to Wiki pages, Articles and Forums. Other Tiki areas and authentication are not supported. You can see in either small font size or magnified version:
