Mod author

This wikiplugin mod allows different content to be displayed depending on whether the user visiting the page is the creator of the page, a contributor or other user. (See Mods User for how to install a mod.)

Usage

Use the following syntax:

```
{AUTHOR(contributor=y|n)}some text{ELSE}other text{AUTHOR}
```

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Accepted values</th>
<th>Effect</th>
<th>Since</th>
</tr>
</thead>
<tbody>
<tr>
<td>contributor</td>
<td>y or n (default: n)</td>
<td>If set to y, only a contributor to the page will see the content (or the content before {ELSE}), if n, only the creator.</td>
<td></td>
</tr>
</tbody>
</table>

A couple of tips on usage:

- The use of {ELSE} is optional
- Contributors cannot be specified if the history for the page has been deleted

Example

With this code,

```
{AUTHOR(contributor=y)}'This note is for contributors to this page.'{ELSE} ''This note is for users who have not yet contributed to this page.''{AUTHOR}
```

Contributors would see: This note is for contributors to this page.

Other visitors would see: This note is for users who have not yet contributed to this page.
