

Module categories

Display links to categories in a tree

Parameters

[Go to the source code](#)

Preferences required: feature_categories

Parameters

type

deep

Accepted Values

any string except for HTML and PHP tags

word

Description

Object type filter to apply when accessing a linked category. Example values: wiki page, article, faq, blog, image gallery, image, file gallery, tracker, trackerItem, quiz, poll, survey, sheet

Show subcategories objects when accessing a linked category. Possible values: on (default), off.

Default	Since

categId

categParentIds

selflink

hideEmpty

int

any string except for HTML and PHP tags

alpha

alpha

Limits displayed categories to a subtree of categories starting with the category with the given ID. Example value: 11. Default: 0 (don't limit display).

Show only these categories and the immediate child categories of these in the order the parameter specifies. Example values: 3,5,6.

y|n .If y, category links to a page named as the category

y|n .If y, only categories with child objects will be shown.

onlyChildren

customURL

alpha

alpha

y|n .If y, only direct child categories will be shown. Default: n

Custom URL for link to send you. Use as placeholder for catId or for name. E.g.

"ProductBrowse?categ=No value assigned"

Example

This code:

```
{MODULE(module=categories) /}
```

Would produce on this site:
