

This replaces [module svnup](#) but for Git.

It will provide a message like "Last updated (Git master:1b4aab18): Monday 24 October, 2022 20:02:40 GMT-0000"

In Tiki 24x

Please note that date is the date of the merge request for the commit. There can be several days or weeks between the two, which is confusing.

So it's more reliable to check the commit ID:
