1.2. Notice the changes in the interface

generated by monitoring too many pages or forum posts.

Once the notification is set up, when the page is changed, the notification counter is updated in the top bar.

Once activated, the eye icon above objects provide a single interface to manage all notifications related to the current object, including categories, structures, translations and other object regroupements.

1.4. View notifications

Notifications use the activity stream feature to preserve notifications that were triggered for users. These can be viewed on the website itself or sent as a periodic digest.

1.5. Digests

Notifications can be viewed on the website itself or sent as a periodic digest.

1.5.1. Enable the notification digest

You can enable the feature notification digests:
