

Plugin Aliases tab

Overview

Use this tab to create a new [wiki plugin](#), by using a modified copy of an existing [plugin](#).

Related Topics

- [Wiki Plugin](#)
- [Plugin Alias](#)

To Access

From the [Text Area](#) Admin page, click the **Plugin Aliases** tab.

Note

if applicable

The screenshot shows the 'Text area' admin interface with the 'Plugin Aliases' tab selected. The page title is 'About plugin aliases'. Below the title, there is a text area for the plugin name, a dropdown for 'Base Plugin' (set to 'addlocost'), and fields for 'Name', 'Description', 'Body Label', 'Dependencies', 'Filter' (set to 'xss'), and 'Validation' (set to 'none'). There is also a checkbox for 'Inline (No Plugin Edit UI)'. Below these are sections for 'Simple Plugin Arguments' (with a 'New Argument' field), 'Plugin Parameter Documentation', 'Plugin Body' (with an 'Ignore User Input' checkbox), and 'Default Content'. At the bottom, there are sections for 'Parameters' and 'Composed Plugin Arguments'. A 'Change preferences' button is located at the bottom right.
