Plugin Carousel

Introduced in Tiki8 and removed before Tiki25. Please see Slider Comparison

Use this wiki plugin to display images in a self-advancing carousel. The plugin uses the infinite carousel jQuery module to display the images of a file gallery. It will produce something similar to http://themes.tiki.org/infinite_carousel. The library can be found at http://www.catchmyfame.com/catchmyfame-jquery-plugins/.

Â Note

This plugin requires the *Can view file galleries (tiki_p_view_file_gallery)* permission.

Parameters

The parameters are no longer visible on this site because it is version 25+ but on your site, you can use

{pluginmanager plugin="carousel"}

Example

This code:

{carousel fgalId="6"}

Would result on this site:
(no longer possible because the current site is 25+)
