PARAMETERS

Plugin Manager error: catpath plugin not found

EXAMPLE

Let's say you had a page with the lyrics to the song *Hands on the Wheel*, and it is categorized by the singer and the composer, and that all pages with song lyrics on the site are categorized as **Songs**. Here's what the CATPATH plugin would produce on that page:

This code,

Example syntax

```
{catpath}
```

Would produce:

[Songs](#) > [Singer](#) > [Willie Nelson](#)

[Songs](#) > [Composer](#) > [Bill Callery](#)
