

# Plugin Category Path

This [wiki plugin](#) displays the full category path for the wiki page where the plugin is inserted.

## Table of contents

- [Plugin Category Path](#)
  - [Parameters](#)
  - [Example](#)

## Parameters

Show the full category path for a wiki page

*Introduced in Tiki 1.*

[Go to the source code](#)

*Preferences required:* feature\_categories, wikiplugin\_catpath

Parameters	Accepted Values	Description	Default	Since
<code>divider</code>		String used to separate the categories in the path. Default character is <code>&gt;</code> .	<code>&gt;</code>	1
<code>top</code>	(blank) y n	Show the top category as part of the path name (not shown by default)	no	1

## Example

Let's say you had a page with the lyrics to the song *Hands on the Wheel*, and it is categorized by the singer and the composer, and that all pages with song lyrics on the site are categorized as **Songs**. Here's what the CATPATH plugin would produce on that page:

*This code,*

### Example syntax

```
{catpath}
```

*Would produce:*

[Songs](#) > [Singer](#) > [Willie Nelson](#)

[Songs](#) > [Composer](#) > [Bill Callery](#)
