Example

This code will cause a pop-up dialog box to appear when this page is loaded:

Plugin

```
{DIALOG(title="World hello Dialog!" buttons="Foo,Bar" actions="alert(\"foo clicked\"),alert(\"you cancelled\")"
showAnim="blind" hideAnim="explode" autoOpen="y" modal="y" wiki="plugin dialog test body"
openAction="testDialog(this);")}Hello World{DIALOG}
```

Example with smartyÂ template

The following code will cause a popup dialog window.

Put this in at the end of your template file:

sample.tpl

```
{wikiplugin _name="DIALOG" autoOpen="n" id="wpdialog_bobshop_shipping" title="Shipping Costs" modal="y"
      wiki="bobshop_shipping"}{/wikiplugin}
```

Don't forget the underscore "_" before the parameter "_name".

Place this code in your template file at the place you want:

sample.tpl

Shipping

In this example there must be a wiki page called "bobshop_shipping". Feel free to create it.

More info for params "hideAnim" and "showAdnim"

More option for the show and hide animations can be found [here](#).
