

Plugin Draw

New in [Tiki8](#) (and backported to 7.1).

Embed a drawing in a wiki page. See [Draw](#) for more information.

Parameters

Embed a drawing in a page

Introduced in Tiki 7.1.

[Go to the source code](#)

Preferences required: feature_draw, wikiplugin_draw

| Parameters | Accepted Values | Description | Default | Since |
|------------|-------------------|---|--------------|-------|
| archive | (blank) y n | The latest revision of file is automatically shown, by setting archive to Yes (y), it bypasses this check and shows the archive rather than the latest revision | n | 8.0 |
| height | | Height in pixels or percentage. Default value is complete drawing height. | Image height | 7.1 |
| width | | Width in pixels or percentage. Default value is page width, for example, 200px or 100% | Image width | 7.1 |
| id | | Internal ID of the file ID | | 7.1 |

Example

This code:

```
{draw id="910"}
```

Would produce:
