Plugin Group

Use this wiki plugin to display content based on the user's groups or friends. It is similar to PluginPerm.

Parameters

Display content based on the user's groups or friends

Introduced in Tiki 1.

Go to the source code

Preferences required: wikiplugin_group

Parameters	Accepted Values
(body of plugin)	
`friends`	username

Description

Wiki text to display if conditions are met. The body may contain `{ELSE}`. Text after the marker will be displayed to users not matching the conditions.

Pipe separated list of users whose friends are allowed to view the block. Example: `admin|johndoe|foo`

Default	Since
	4.0

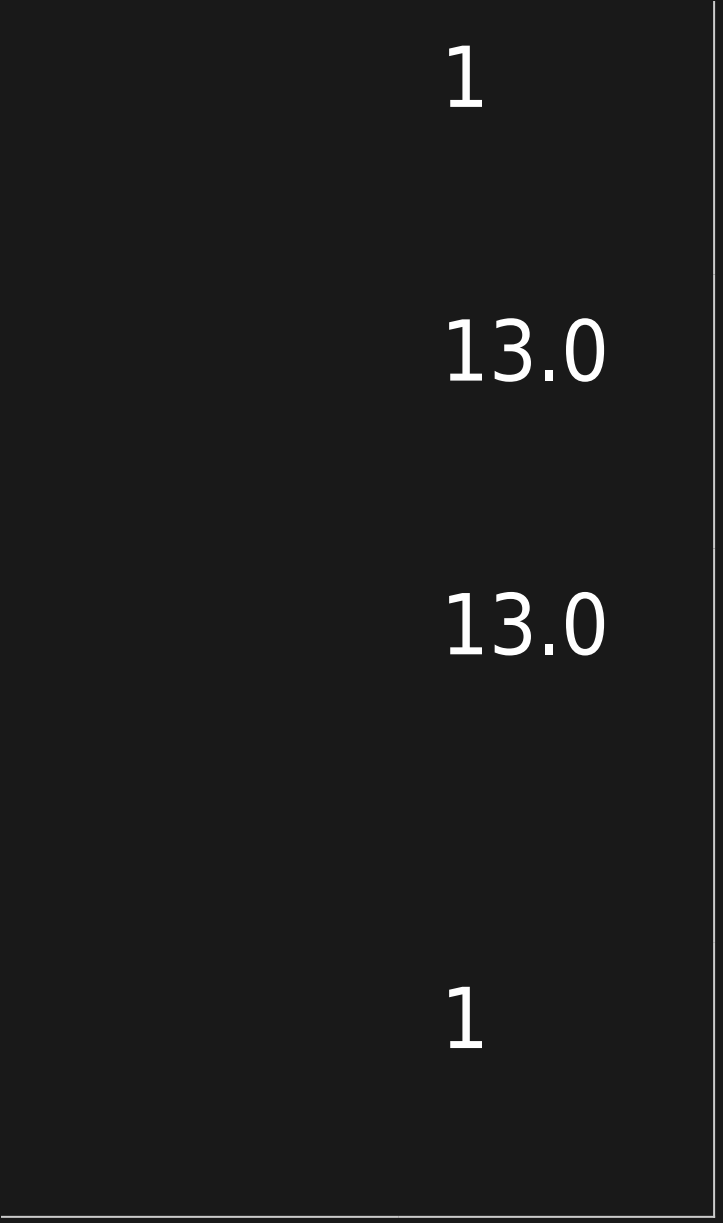

`groups`	groupname *separator:* |
`notpending`	groupname *separator:* |
`pending`	groupname *separator:* |
`notgroups`	groupname *separator:* |

Pipe separated list of groups allowed to view the block. Example: `Admins|Developers`

User allowed to view block if membership in the group (or pipe-separated list of groups) is not pending.

User allowed to view block if membership payment to join group (or pipe-separated list of groups) is outstanding.

Pipe-separated list of groups not allowed to view the block.

Notes onÂ usage

- The `{ELSE}` part is optional.
- The `groups` and `notgroups` parameters may be used at the same time.

- Groups can be included in other groups, and this can impact how this plugin behaves. For example, if you want a section to be seen by the group A and the group Admins (`groups="Admins|A"`), and not by group B (`notgroups="B"`), be careful not to include group B in the Admins group . If Admins includes A and B, Admins will not see the section.

Examples

Basic syntax

{GROUP(groups="Registered|Admins" notgroups="Editors")}show this content for users included/excluded from groups specified in the parameters{ELSE}otherwise show this content{GROUP}

Security

Use of this plugin to hide sensitive information will not prevent it from being revealed to users with permissions to view or edit the page source. Users that have a Watch on the wiki page will receive an email with the entire wiki page source, thus revealing the information regardless whether the content would be hidden because of this plugin.
