# Plugin Language

Use the wiki plugin to vary content based on the page language.

## PARAMETERS

Show alternative content based on the page language
*Introduced in Tiki 1.*
Go to the source code
*Preferences required:* feature_multilingual, wikiplugin_lang

| Parameters | Accepted Values |
|---|---|
| (body of plugin) | |
| `lang` | |

## Description

Content to show

List of languages for which the block is displayed. Languages use the two letter language codes (ex: en, fr, es, …). Use + to separate multiple languages.

| Default | Since |
|---------|-------|
|         | 1     |

notlang

List of languages for which the block is not displayed. Languages use the two letter language codes (ex: en, fr, es, ...). Use ⊞ to separate multiple languages.

🛈 Note

Cached pages don't render this plugin correctly. Do not cache the page that this plugin is used on.

# EXAMPLES

## BASED ON LANGUAGE

```
{LANG(lang="en")}Hello{LANG} {LANG(lang="fr")}Bonjour{LANG}
```

If the current language is en (English), "Hello" will be displayed. If it is fr (French), "Bonjour".

## BASED ON LANGUAGE AND NOT LANGUAGE

*This code:*

```
{LANG(lang="fr")}Bonjour le monde!{LANG}{LANG(lang="es")}ÃƒÆ'Ã¢â‚¬Å¡Ãƒâ€šÃ‚¡Hola, mundo!{LANG}{LANG(notlang="fr+es")}Hello world!{LANG}
```

*Would produce on this site:*
Hello world!

## WITH PLUGINTRANSLATED

The language can match the `lang` url parameter. So if you couple this plugin with the PluginTranslated, you can have a kind of multilinguism:

{LANG(lang="fr")}en FranÃ*ƒÆ'Ã*†â€™Ã*ƒâ€šÃ*‚§ais{LANG} {LANG(lang="en")}in English{LANG} --- (page break)
{TRANSLATED(flag="France" lang="fr")}[./tiki-index_raw.php?page=MyPage&lang=fr|>>]{TRANSLATED}
{TRANSLATED(flag="United_States" lang="en")}[./tiki-index_raw.php?page=MyPage&lang=en|>>]{TRANSLATED}
