

## Plugin List Pages

Use this [wiki plugin](#), introduced in [Tiki2](#), to list pages according to various criteria.

## Parameters

List pages based on various criteria

*Introduced in Tiki 2.*

[Go to the source code](#)

*Preferences required:* `wikiplugin_listpages`, `feature_listPages`

| Parameters                     | Accepted Values    | Description   | Default | Since |
|--------------------------------|--------------------|---|---------|-------|
| <code>find</code>              |                    | Only pages with names similar to the text entered for this parameter will be listed   |         | 2.0   |
| <code>translations</code>      |                    | User- or pipe-separated list of two-letter language codes for additional languages to display. If the language parameter is not defined, the first element of this list will be used as the primary filter. |         | 3.0   |
| <code>translationOrphan</code> |                    | User- or pipe-separated list of two-letter language codes for additional languages to display. List pages with no language or with a missing translation in one of the language                             |         | 7.0   |
| <code>excludetag</code>        |                    | Only pages with specific tag excluded (separate tags using ;)   |         | 10.3  |
| <code>includetag</code>        |                    | Only pages with specific tag (separate tags using ;)  |         | 10.3  |
| <code>initial</code>           |                    | Initial page to show  |         | 2.0   |
| <code>lang</code>              | <code>alpha</code> | Two-letter language code to filter pages listed.  |         | 3.0   |

|                            |                   |   |              |      |
|----------------------------|-------------------|---|--------------|------|
| offset_arg                 |                   | Argument, id of the plugin (if more than one on the page), for pagination   |              | 15.3 |
| langOrphan                 | alpha             | Two-letter language code to filter pages listed. Only pages not available in the provided language will be listed.  |              | 3.0  |
| pagination                 | (blank)<br>y<br>n | Turn on pagination  |              | 15.3 |
| start                      |                   | When only a portion of the page should be included, specify the marker from which inclusion should start.   |              | 5.0  |
| end                        |                   | When only a portion of the page should be included, specify the marker at which inclusion should end.   |              | 5.0  |
| length                     | int               | Number of characters to display   |              | 5.0  |
| max                        | int               | Limit number of items displayed in the list. Default is to display all.   | -1           | 2.0  |
| offset                     | digits            | Result number at which the listing should start.  | 0            | 2.0  |
| sort                       | text              | Sort ascending or descending on any field in the tiki_pages table. Syntax is field name followed by _asc or _desc. Two examples: lastModif_desc<br>pageName_asc | pageName_asc | 2.0  |
| showCheckbox               | (blank)<br>y<br>n | Option to show checkboxes   | y            | 7.0  |
| exact_match                | (blank)<br>y<br>n | Page name and text entered for the filter parameter must match exactly to be listed   |              | 2.0  |
| for_list_pages             | (blank)<br>y<br>n |   | y            | 2.0  |
| only_orphan_pages          | (blank)<br>y<br>n | Only list orphan pages  |              | 2.0  |
| showNameAndDescriptionOnly | (blank)<br>y<br>n | Show only the page names and descriptions   |              | 24.0 |
| showNameOnly               | (blank)<br>y<br>n | Show only the page names  |              | 2.0  |

|                   |                        |  |   |      |
|-------------------|------------------------|--|---|------|
| showPageAlias     | (blank)<br>y<br>n      | Show page alias in the list  |   | 2.0  |
| structHead        | (blank)<br>y<br>n      | Filter by structure head   |   | 2.0  |
| categId           |                        | Filter categories by Id numbers. Use different separators to filter as follows:<br>: - Page is in any of the specified categories. Example: 1:2:3<br>+ - Page must be in all of the specified categories. Example: 1+2+3<br>- - Page is in the first specified category and not in any of the others. Example: 1-2-3 |   | 2.0  |
| exclude_pages     | pagename<br>separator: | Wiki page names to be excluded from list   |   | 19.0 |
| showNumberOfPages | (blank)<br>y<br>n      | Show the number of pages matching criteria   | n | 10.3 |

## Example

This code,

```
{listpages find="module" exact_match="y"}
```

Would produce on this site:

|  | Page   | Hits                                | Last modification           | Last author        | Version | Links              | Backl. | Lang. | Categories |
|--|--------|-------------------------------------|-----------------------------|--------------------|---------|--------------------|--------|-------|------------|
| <a href="#">Module Introduction to modules</a> | 112782 | Wed 27 Nov, 2024 15:22 GMT-0000     | <a href="#">Volker Wysk</a> | <a href="#">81</a> | 19      | <a href="#">87</a> | en     |       |            |
|  |        | <i>Fixed error in php file name</i> |                             |                    |         |                    |        |       |            |
