

# Plugin Mail

Introduced in *Tiki5*

This [wiki plugin](#) allows users to directly mail other users or groups. This plugin can be placed in a wiki page, but functions like the message system in [MyAccount](#).

## Parameters

Mail other users or groups

Introduced in *Tiki 3*. Required parameters are in **bold**.

[Go to the source code](#)

Preferences required: `wikiplugin_mail`

<code>showuser</code>	(blank) y n	Show a box for user to enter email addresses	y	5.0

## Example

The screenshot shows an email composition interface. It includes the following fields and controls:

- Send to users:** A dropdown menu with a list of users: admin, andre, dona, sgrever. A second dropdown menu is open, showing names: Andrew, Grev, System Administrator, Willis, W.
- Send to:** A text input field.
- Send to groups:** A dropdown menu with a list of groups: Ac, Aca, Acau, Admins, Editors, Elize.
- Subject:** A text input field.
- Message:** A large text area for the email body.
- Send Mail:** A button at the bottom left.

Choose between a drop down of user logins, user real names, or groups names, or direct input of emails. The groups list can be limited to the groups that include a specific group. The mail will be sent as a unique email from the webserver but the email address of the sender will appear in the "from:" address.
