

Plugin Mail

Introduced in [Tiki5](#)

This [wiki plugin](#) allows users to directly mail other users or groups. This plugin can be placed in a wiki page, but functions like the message system in [MyAccount](#).

Parameters

Mail other users or groups

Introduced in [Tiki 3](#). Required parameters are in **bold**.

[Go to the source code](#)

Preferences required: `wikiplugin_mail`

Example

Send to users:

admin
andre
dona
dona
sgreverc

Andrew
Grev
System Administrator
Willi
W

Send to:

Send to groups:

Ac
Ac
Ac
Ac
Admins
Editors
Elize

Subject:

Message:

Choose between a drop down of user logins, user real names, or groups names, or direct input of emails. The groups list can be limited to the groups that include a specific group. The mail will be sent as a unique email from the webserver but the email address of the sender will appear in the "from:" address.
