Plugin Object Hits

Use this wiki plugin to display the number of hits for a wiki page, article, image gallery, file gallery and individual images or files in a gallery. The total number of hits can be displayed or the number of hits over the past x number of days.

PARAMETERS

Display the number of hits for certain objects
Introduced in Tiki 1.
Go to the source code
Preferences required: wikiplugin_objecthits

Parameters	Accepted Values
days	digits
since	text

Description

Show the number of hits over the past number of days indicated. Default is to show all hits.

Date since the hits are collected in a format supported by strtotime

Default	Since
0	1
	10.0

type	alpha
object	text

Object type, such as wiki, file gallery, file, article, etc.
Default is `wiki`.

For a wiki page, the page name, for other object types:
ID number + ? + object title

wiki	1
	1

ℹ Note about file galleries

The plugin works differently for file galleries than described above:

- Prior to version 3.0
  - The ID number that will work in the *object* parameter may be different than the actual ID number for a file gallery (sometimes it's "-1"). You would need to look in the tiki_stats MySQL database table on the server where TikiWiki is installed to see what number to use.
- With version 3.0
  - Only the hits for the top level File Galleries can be displayed, and this is done by setting the *object* parameter to "0?" and the *type* parameter to "file gallery" (both without the quotes). The result is essentially the number of hits for the List Galleries page.
