Parameters

Introduced in Tiki 15. Required parameters are in **bold**.

[Go to the source code](#)

Preferences required: `wikiplugin_useringroup`

Parameters	Accepted Values
testgroup	text
userId	text
falsestext	text
truestext	text

Description

the Group that the userId check is made against
the userId to be checked

The text that is displayed if the test result is false

The text that is displayed if the test result is true

Default	Since
	15.0
	15.0
false	15.0
true	15.0

Example

This code:

```
{useringroup userId="admin" testgroup="Registered" truetext="the user IS in the Group" falsetext="the user is NOT in the Group"}
```

Would produce on this site:

the user IS in the Group
