- [Plugin USERINGROUP](#)
 - [Parameters](#)
 - [Example](#)

Parameters

checks if an individual user is in a particular Group and simply return a string set to either true or false
Introduced in Tiki 15. Required parameters are in **bold**.

[Go to the source code](#)

Preferences required: `wikiplugin_useringroup`

Parameters	Accepted Values	Description	Default	Since
<code>testgroup</code>	text	the Group that the userId check is made against		15.0
<code>userId</code>	text	the userId to be checked		15.0
<code>falsetext</code>	text	The text that is displayed if the test result is false	false	15.0

truetext	text	The text that is displayed if the test result is true	true	15.0
----------	------	---	------	------

Example

This code:

```
{useringroup userId="admin" testgroup="Registered" truetext="the user IS in the Group"  
falsetext="the user is NOT in the Group"}
```

Would produce on this site:

the user IS in the Group
