

# Rating Tracker Field

This is a [stub](#)

Introduced in [Tiki8](#), this is the corresponding tracker field to the feature [Rating](#) and [Advanced Rating](#).

In [Tiki12](#), at least, you have 3 modes:

- Stars
- Radio Buttons
- Single option: e.g. Like

You can also set the labels to something else different from the real values that will be stored for the calculation of average, etc.

In this example, below, the tracker field Rating was set with:

- Option: -2,-1,0,1,2
- Mode: Stars
- Labels: -2,-1,0,1,2

The screenshot shows a web interface for a 'Tracker: Bugs & Wish list'. At the top, there are buttons for 'Trackers' and 'View Items'. Below this, a message reads: 'If this is your first time, please read: How to Submit a new item on the Wish list'. The main content area has a header 'Tracker Items' and a button 'Insert New Item'. It displays 'Items found: 1552'. A table with columns 'New Rating', 'Subject', and 'Subj' is shown. The first row has a rating of 1 and the subject '(1)Monitoring pre-dogfood servers'. The second row has a rating of 2 and the subject '(2)Together: make it work for wiki pages, spreadsheet, drawing.'. A tooltip for the second row shows 'Number of votes: 2, Average: 1.5, Your rating: 2'. The third row has a rating of 1 and the subject '(1)Screencasts in comments: no longer showing'.
