

Referer Stats

Overview

This page shows the different sources (*referring domains*) that have sent traffic to your Tiki site. Each **hit** represents a visit from a person who clicked to your site from the referring domain.

To Access

From the Admin menu, select **Admin > Referer Stats**.

or

Access http://example.org/tiki-referer_stats.php

Note

You must enable the **Referer Stats** option on the [General Settings](#) tab of the [General Admin](#) page.

The screenshot shows the 'Referer stats' page with a search bar and a table of data. The table has three columns: Domain, Hits, and Last. The data is as follows:

Domain	Hits	Last
info.tiki.org	355450	17:35 UTC
doc.tiki.org	345917	17:34 UTC

Referer Stats page

Field

Description

Domain

The URL of the referring site. Click the domain name to view the actual referring page.

Hits

The total number of referrals from the domain.

Last

The time and date of the last (most recent) referral from this domain.

Unable to load the jQuery Sortable Tables feature.

To use this feature, enable the **Referer Stats** option in the **Stats** area of the **General Settings** tab on the [General Admin](#) page.

Click **Clear Stats** to erase (*clear*) the referrer stats database.

See [Stats Admin](#) for additional site statistics

There is the option to view the Referer stats, through "Admin > Referer stats" (which will lead you to "**tiki-referer_stats.php**")

You will be able to see the domain from which the users came from when viewing your site:

The screenshot shows the 'Referer stats' interface. At the top, there is a title 'Referer stats' with a help icon, a 'clear stats' link, and a search form with a 'Find' input field and a 'find' button. Below the search form is a table with three columns: 'term', 'hits', and 'last'. The table lists various referrer domains and their corresponding hit counts and last access dates. At the bottom of the table, there is a pagination indicator: 'Page: 1/22 [next]'.

term	hits	last
