

Tiki Manager Package

Starting in Tiki25, Tiki Manager can be added as a Package to any Tiki instance. It has many uses, including Automatic updates. This replaces the standalone Tiki Manager Web UI with something more robust and flexible.

Initial code: https://gitlab.com/tikiwiki/tiki/-/merge_requests/1374

Development ideas: Tiki Manager within Tiki

Command Line

```
2022-04-15 14:33:30
When the Tiki Manager Package is installed, these commands appear in
php tiki-console.php

gallery
gallery:migrate Migrate images from the Image Gallery to the File Gallery
Goal
goal:check Review all active goals and assigns rewards.
index
index:catch-up Catch-up on incremental indexing.
index:compare-engines Compare search engine results in wikiplugins
index:optimize Optimize the unified search index.
index:rebuild Fully rebuild the unified search index
installer
installer:lock Disable the installer
list
list:execute Perform Plugin ListExecute command on a particular page
mail-in
mail-in:poll Read the mail-in messages
mail-queue
mail-queue:send Send the messages stored in the Mail Queue
manager
manager:backups:delete Delete backups folder
manager:cache:clear Clears application's cache
manager:database:delete Delete database
manager:database:view View database
manager:instance:access Remove access to instance
manager:instance:backup Backup instance
manager:instance:blank Creates a new blank instance
manager:instance:check Check instance
manager:instance:clone Clone instance
manager:instance:cloneandupgrade Clone and upgrade instance
manager:instance:console Run Tiki console commands
manager:instance:copysshkey Copy SSH key
manager:instance:create Creates a new instance (or take over an already installed Tiki)
manager:instance:delete Delete instance connection
manager:instance:detect Detect Tiki branch or tag
manager:instance:edit Edit instance
manager:instance:fixpermissions Fix permission on a Tiki instance
manager:instance:import Import instance
manager:instance:list List instances
manager:instance:maintenance Instances under maintenance
manager:instance:patch:apply Apply a patch of Tiki source or 3rd party vendor source to an instance
manager:instance:patch:delete Delete a patch applied to an instance
manager:instance:patch:list List patches applied to an instance
manager:instance:profile:apply Apply profile to instance
manager:instance:restore Restore a blank installation
manager:instance:revert Revert instance state
manager:instance:setup:scheduler-cron Setup instance's scheduler cron
manager:instance:stats Fetch data (ex: KPIs) from instances.
manager:instance:update Update instance
manager:instance:upgrade Upgrade instance
manager:instance:verify Verify instance
manager:instance:watch Perform a hash check
manager:logs:clear Clear logs folder
manager:manager:check Check Tiki Manager requirements
manager:manager:info Show Tiki Manager Info
manager:manager:report Manage reports
manager:manager:reset Reset Tiki Manager
manager:manager:setup-backups [backups:setup] Set-up a cronjob to perform instance backups
manager:manager:setup-clone [setup:clone] Setup a cronjob to perform instance clone
manager:manager:setup-update Setup automatic instance updates
manager:manager:setup-watch Set-up cron job to perform hash checks
manager:manager:update Update Tiki Manager
manager:tiki:versions List Tiki versions
manager:webmanager:block Block webmanager login related process
manager:webmanager:enable Activate Tiki Manager web administration
nl
mltrain Train a particular machine learning model
multitiki
multitiki:list List MultiTikis in a path
multitiki:move Moves a MultiTiki site from one tiki instance to another
notification
notification:digest Send out email notification digests

```

Web Interface

As of 2022-07-05, this is functional in trunk, but for more interactivity and reliability, we will add support for <https://reactphp.org>

Back-end admin panel

See the Tiki Manager link in the admin menu (tiki-ajax_services.php?controller=manager&action=index). This is the full back-end interface

Tracker field

Tiki Manager [Tracker Field](#) is for when you want to have meta data associated to your instances, or if you want to launch Tiki instances from Tracker items.

Wiki Plugin

[PluginTikiManager](#) is for when you want to present a simple user interface, with a subset of functionality.

Virtualmin

- If you connect to a Virtualmin instance, you get even more features:
<https://wikisuite.org/Tiki-Manager-Package-connecting-to-Virtualmin>
