

Tiki Manager Package

Starting in Tiki25, Tiki Manager can be added as a Package to any Tiki instance. It has many uses, including Automatic updates. This replaces the standalone Tiki Manager Web UI with something more robust and flexible.

Initial code: https://gitlab.com/tikiwiki/tiki/-/merge_requests/1374

Development ideas: Tiki Manager within Tiki

Command Line

```
2022-04-15 14:33:30
When the Tiki Manager Package is installed, these commands appear in
php tiki-console.php

gallery
  gallery:migrate          Migrate images from the Image Gallery to the file gallery
  goal                    Reviews all active goals and assigns rewards.
  index                  Catches up on incremental indexing
  index:compare-engines  Compare search engine results in wikiplugins
  index:optimize         Optimize the unified search index
  index:rebuild          Fully rebuild the unified search index
  installer              Disable the installer
  list                   Perform Plugin ListExecute command on a particular page
  mail                   Perform Plugin MailExecute command on a particular page
  mail:in-poll           Read the mail-in messages
  mail:queue             Send the messages stored in the Mail Queue
  manager
  manager:backup:delete  Delete backups folder
  manager:clear:clear    Clear application's cache
  manager:database:delete Delete database
  manager:database:view View database
  manager:instance:access Remote access to instance
  manager:instance:backup Backup instance
  manager:instance:blank Creates a new blank instance
  manager:instance:check Check instance
  manager:instance:clone Clone instance
  manager:instance:clone:upgrade Run tiki console commands
  manager:instance:copy:sshkey Copy SSH key
  manager:instance:create Creates a new instance (or take over an already installed Tiki)
  manager:instance:delete Delete instance connection
  manager:instance:direct Direct tiki branch on tag
  manager:instance:edit  Edit instance
  manager:instance:filepermissions File permissions on a Tiki instance
  manager:instance:import Import instance
  manager:instance:list List instances
  manager:instance:maintenance Instance under maintenance
  manager:instance:patch:apply Apply a patch of Tiki source or 3rd party vendor source to an instance
  manager:instance:patch:delete Delete a patch applied to an instance
  manager:instance:patch:list List patches applied to an instance
  manager:instance:profile:apply Apply profile to instance
  manager:instance:restore Restore a blank installation
  manager:instance:revert Revert instance state
  manager:instance:setup:scheduler:cron Setup instance's scheduler cron
  manager:instance:stats Fetch data (ex: KPIs) from instances.
  manager:instance:update Update instance
  manager:instance:upgrade Upgrade instance
  manager:instance:verify Verify instance
  manager:instance:watch Perform an hash check
  manager:logs:clear      Clear logs folder
  manager:manager:check  Check Tiki Manager's requirements
  manager:manager:info   Show Tiki Manager's info
  manager:manager:report Manage reports
  manager:manager:reset  Reset Tiki Manager
  manager:manager:setup:backup [backup:setup] Set-up a cronjob to perform instance backups
  manager:manager:setup:clone [setup:clone] Setup a cronjob to perform instance clone
  manager:manager:setup:update Setup automatic instance updates
  manager:manager:setup:watch Backup cron job to perform hash checks
  manager:manager:update Update Tiki Manager
  manager:tiki:version   List Tiki versions
  manager:webmanager:login Related process
  manager:webmanager:enable Activate Tiki Manager web administration
  ml                    Train a particular machine learning model
  multikit              List Multikit in a path
  multikit:move         Move a Multikit site from one tiki instance to another
  notification          Send out email notification digests
```

Web Interface

As of 2022-07-05, this is functional in trunk, but for more interactivity and reliability, we will add support for <https://reactphp.org>

Back-end admin panel

See the Tiki Manager link in the admin menu (tiki-ajax_services.php?controller=manager&action=index). This is the full back-end interface

Tracker field

[Tiki Manager Tracker Field](#) is for when you want to have meta data associated to your instances, or if you want to launch Tiki instances from Tracker items.

Wiki Plugin

[PluginTikiManager](#) is for when you want to present a simple user interface, with a subset of functionality.

Virtualmin

- If you connect to a Virtualmin instance, you get even more features:
<https://wikisuite.org/Tiki-Manager-Package-connecting-to-Virtualmin>
