

# Tiki Manager Package

Starting in [Tiki25](#), [Tiki Manager](#) can be added as a [Package](#) to any Tiki instance. It has many uses, including [Automatic updates](#). This replaces the standalone [Tiki Manager Web UI](#) with something more robust and flexible.

## Command Line

```
2022-04-15 14:33:30
When the Tiki Manager Package is installed, these commands appear in
php tiki-console.php

gallery_migrate          Migrate images from the Image Gallery to the File Gallery

index-rebuild           Refresh the unified search index
index-rebuild           Fully rebuild the unified search index
installer              Disable the installer
list                    Disable the installer
list_associate          Performs Plugin List/associate command on a particular page
mail_in                Read the mail-in messages
mail_in_poll           Read the mail-in messages
mail_in_send           Send the messages stored in the Mail Queue
manager_backups_delete Delete backups folder
manager_cron_clean     Clears application's cache
manager_database_delete Delete database
manager_database_view  View database
manager_instance_access Remotes access to instance
manager_instance_backup Backup instance
manager_instance_clone Create a new blank instance
manager_instance_clone Clone instance
manager_instance_clone_and_upgrade Clone and upgrade instance
manager_instance_console Run Tiki console commands
manager_instance_copy_key Copy SSH key
manager_instance_create Create a new instance (or take over an already installed Tiki)
manager_instance_delete Delete instance connection
manager_instance_detect Detect Tiki branch or tag
manager_instance_email Edit instance
manager_instance_file_permissions File permissions on a Tiki instance
manager_instance_info Report instance
manager_instance_list List instances
manager_instance_maintenance Instances under maintenance
manager_instance_patch_apply Apply a patch of file source or 3rd party vendor source to an instance
manager_instance_patch_delete Delete a patch applied to an instance
manager_instance_profile_list List profile applied to an instance
manager_instance_profile_apply Apply profile to instance
manager_instance_revert Revert a blank installation
manager_instance_revert Revert instance state
manager_instance_setup_scheduler_cron Setup instance's scheduler cron
manager_instance_stats Fetch data (ex: KPIs) from instances.
manager_instance_update Update instance
manager_instance_upgrade Upgrade instance
manager_instance_verify Verify instance
manager_instance_watch Perform an hash check
manager_login_clear    Clear login folder
manager_manager_check  Check Tiki Manager requirements
manager_manager_info   Show Tiki Manager info
manager_manager_report Manager reports
manager_manager_revert Revert Tiki Manager
manager_manager_setup_backups [backups setup] Set-up a cronjob to perform instance backups
manager_manager_setup_clone [instance clone] Set-up a cronjob to perform instance clone
manager_manager_setup_update Setup automatic instance updates
manager_manager_setup_watch Setup cron job to perform hash checks
manager_manager_update Update Tiki Manager
manager_tiki_version   List Tiki versions
manager_wikiadmin_block Block wikiadmin login related process
manager_wikiadmin_block Activate Tiki Manager web administration
ai_train              Train a particular machine learning model
multitiki             List Multitiki in a path
multitiki_move        Moves a Multitiki site from one tiki instance to another
notification_digest    Send out email notification digests
```

## Web Interface

As of 2022-07-05, this is functional in trunk, but for more interactivity and reliability, we will add support for [Realttime](#).

## Back-end admin panel

See the Tiki Manager link in the admin menu (tiki-ajax\_services.php?controller=manager&action=index). This is the full back-end interface

## Tracker field

[Tiki Manager Tracker Field](#) is for when you want to have meta data associated to your instances, or if you want to launch Tiki instances from Tracker items.

## Wiki Plugins

- [PluginTikiManager](#) is for when you want to present a simple user interface, with a subset of functionality.
- [PluginTikiManagerClone](#)
- [PluginTikiManagerUpdate](#)

## Virtualmin

- If you connect to a Virtualmin instance, you get even more features:  
<https://wikisuite.org/Tiki-Manager-Package-connecting-to-Virtualmin>

## Development

- Initial code: [https://gitlab.com/tikiwiki/tiki/-/merge\\_requests/1374](https://gitlab.com/tikiwiki/tiki/-/merge_requests/1374)
- Development ideas: [Tiki Manager within Tiki](#)
