

Tiki Manager Package

Starting in [Tiki25](#), [Tiki Manager](#) can be added as a [Package](#) to any Tiki instance. It has many uses, including [Automatic updates](#). This replaces the standalone [Tiki Manager Web UI](#) with something more robust and flexible.

Command Line

```
2022-04-15 14:33:30
When the Tiki Manager Package is installed, these commands appear in
php tiki-console.php
gallery
gallery.migrate Migrate images from the Image Gallery to the File Gallery
goal
goal.check
goal.summary
index
index.catch-up Catch-up on incremental indexing.
index.compare-entries Compare search engine results in wikilogins
index.optimize Optimize the unified search index
index.rebuild Fully rebuild the unified search index
installer
installer.lock Disable the installer
list
list.execute Perform Plugin ListExecute command on a particular page
mail.in
mail.in.poll Read the mail-in messages
mail.queue Send the messages stored in the Mail Queue
manager
manager.backups.delete Delete backups folder
manager.cache.clear Clear application's cache
manager.database.delete Delete database
manager.instance.access View database
manager.instance.access Remove access to instance
manager.instance.backup Backup instance
manager.instance.blank Create a new blank instance
manager.instance.close Close instance
manager.instance.close.backup Close old backup instance
manager.instance.console Run Tiki console commands
manager.instance.console Copy Job Log
manager.instance.create Create a new instance (or take over an already installed Tiki)
manager.instance.delete Delete instance connection
manager.instance.detect Detect Tiki branch or tag
manager.instance.help Help instance
manager.instance.permissions Fix permission on a Tiki instance
manager.instance.reset Reset instance
manager.instance.list List instances
manager.instance.maintenance Instance under maintenance
manager.instance.patch.apply Apply a patch of Tiki source or 3rd party vendor source to an instance
manager.instance.patch.delete Delete a patch applied to an instance
manager.instance.patch.list List patches applied to an instance
manager.instance.profile.apply Apply profile to instance
manager.instance.restore Restore a blank installation
manager.instance.reset Reset instance state
manager.instance.setup.scheduler.cron Setup instance's scheduler cron
manager.instance.state Fetch data (as, PPI) from instances.
manager.instance.update Update instance
manager.instance.update Upgrade instance
manager.instance.verify Verify instance
manager.instance.verify Perform a hash check
manager.logs.clear Clear logs folder
manager.manager.check Check Tiki Manager requirements
manager.manager.info Show Tiki Manager Info
manager.manager.report Manage reports
manager.manager.reset Reset Tiki Manager
manager.manager.reset-backups [backup-test] Set-up a cronjob to perform instance backups
manager.manager.reset-clone [setup-clone] Set-up a cronjob to perform instance clone
manager.manager.reset-update Setup automatic instance updates
manager.manager.setup-watch Set-up cron job to perform hash checks
manager.manager.update Update Tiki Manager
manager.tiki.verify List Tiki versions
manager.webmanager.block Block webmanager login related process
manager.webmanager.enable Activate Tiki Manager web administration
all
all.trace Trace particular module learning model
multitiki
multitiki.list List Multitiki on a path
multitiki.move Move a Multitiki site from one tiki instance to another
multitiki.send Send out email notification digests
```

Web Interface

As of 2022-07-05, this is functional in trunk, but for more interactivity and reliability, we will add support for [Realtime](#).

Back-end admin panel

See the [Tiki Manager](#) link in the admin menu (tiki-ajax_services.php?controller=manager&action=index). This is the full back-end interface

Tracker field

[Tiki Manager Tracker Field](#) is for when you want to have meta data associated to your instances, or if you want to launch Tiki instances from Tracker items.

Wiki Plugins

- [PluginTikiManager](#) is for when you want to present a simple user interface, with a subset of functionality.
- [PluginTikiManagerClone](#)
- [PluginTikiManagerUpdate](#)

Virtualmin

- If you connect to a Virtualmin instance, you get even more features:
<https://wikisuite.org/Tiki-Manager-Package-connecting-to-Virtualmin>

Development

- Initial code: https://gitlab.com/tikiwiki/tiki/-/merge_requests/1374
- Development ideas: [Tiki Manager within Tiki](#)
