Tiki 25.0 was released in December 2022, shortly after Tiki turned 20 years old!

Here is announcement: [https://tiki.org/article497-Biggest-Tiki-Release-Ever-Tiki-25](https://tiki.org/article497-Biggest-Tiki-Release-Ever-Tiki-25)

You can see the development page at: [https://dev.tiki.org/Tiki25](https://dev.tiki.org/Tiki25) and all the code commits here: [https://gitlab.com/tikiwiki/tiki/-/commits/25.x/](https://gitlab.com/tikiwiki/tiki/-/commits/25.x/)

Because of all the enhancements and changes, you should do **more than usual** testing before upgrading.

It is a Standard Term Support (STS) version and will be supported until Tiki 26.1 is released, as per the Tiki lifecycle policy.

Since this is a post-LTS, it has major changes, such as an upgrade to

- **Bootstrap 5**, which was released in May 2021.
- **Smarty 4**, which was released in November 2021
- **Font Awesome 6**, which was released in February 2022
- However, the PHP **Requirements** remain at version 7.4, the same as **Tiki24**.
  - Support for **PHP 8** will be added in **Tiki26**, and it is likely that the minimum PHP version will increase for **Tiki27 LTS** (perhaps to PHP 8.1). So if you expect to not be able to upgrade beyond PHP 7.4, you should stay with **Tiki24 LTS**. Please see **Versions**.
Browser support

Given the fact our themes and Smarty templates rely on Bootstrap 5 heavily, the browser support for Tiki 25 follows the same path:

- Dropped Internet Explorer 10 and 11
- Dropped Microsoft Edge < 16 (Legacy Edge)
- Dropped Firefox < 60
- Dropped Safari < 12
- Dropped iOS Safari < 12
- Dropped Chrome < 60
