

# Tracker Field Types

[Tracker fields](#) can be imagined as columns in a [tracker](#) table. (While the Tracker items are rows data.)

See: [Adding fields to a tracker](#).

For **definition list of names values for the fields** (in case you need to do some advanced magic with them), please refer to the developer's [Tracker Field Types](#) overview.

Some of the field types have some more documentation including examples, etc:

## Overview

Enable or disable what field types are available in Tiki

## To Access
