## Pick "Custom Create"

Windows Azure

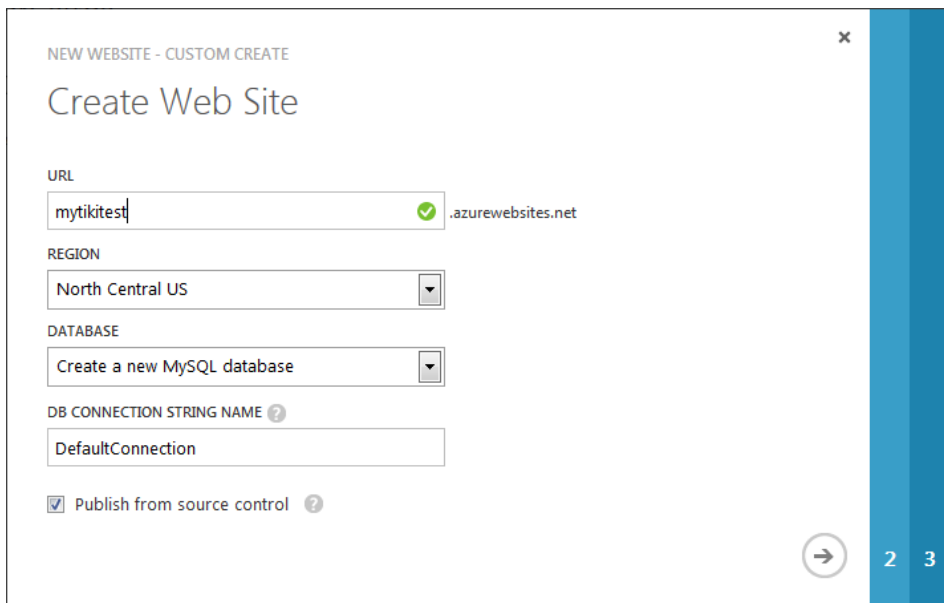

WEB SITES 0

web sites **PREVIEW**

NEW

COMPUTE	WEB SITE <b>PREVIEW</b>	QUICK CREATE	URL
DATA SERVICES	VIRTUAL MACHINE	CUSTOM CREATE	REGION
APP SERVICES	MOBILE SERVICE <b>PREVIEW</b>	FROM GALLERY	North Central US
NETWORKS	CLOUD SERVICE		

## Choose options for site

NEW WEBSITE - CUSTOM CREATE

### Create Web Site

URL: mytikitest ✓ .azurewebsites.net

REGION: North Central US

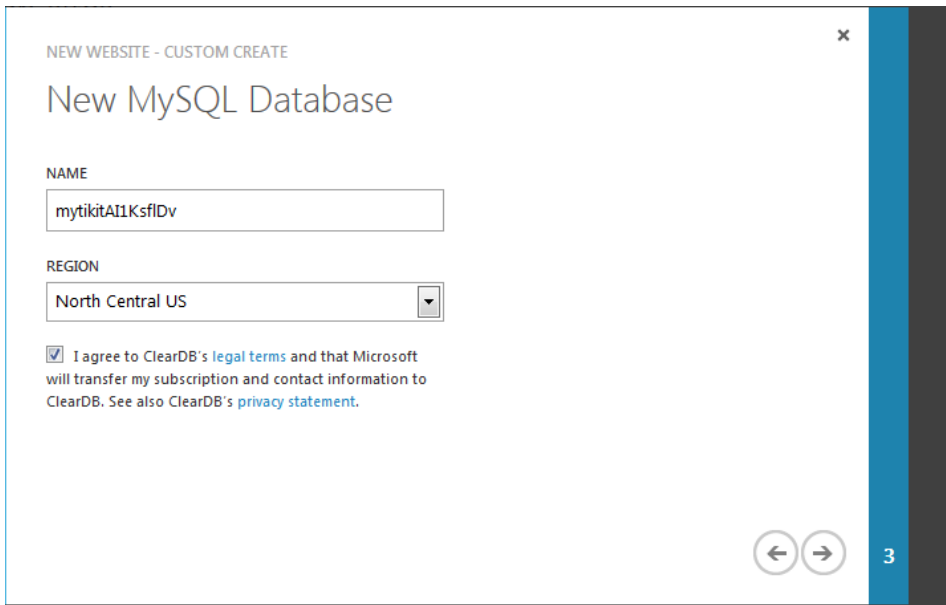

DATABASE: Create a new MySQL database

DB CONNECTION STRING NAME: DefaultConnection

Publish from source control

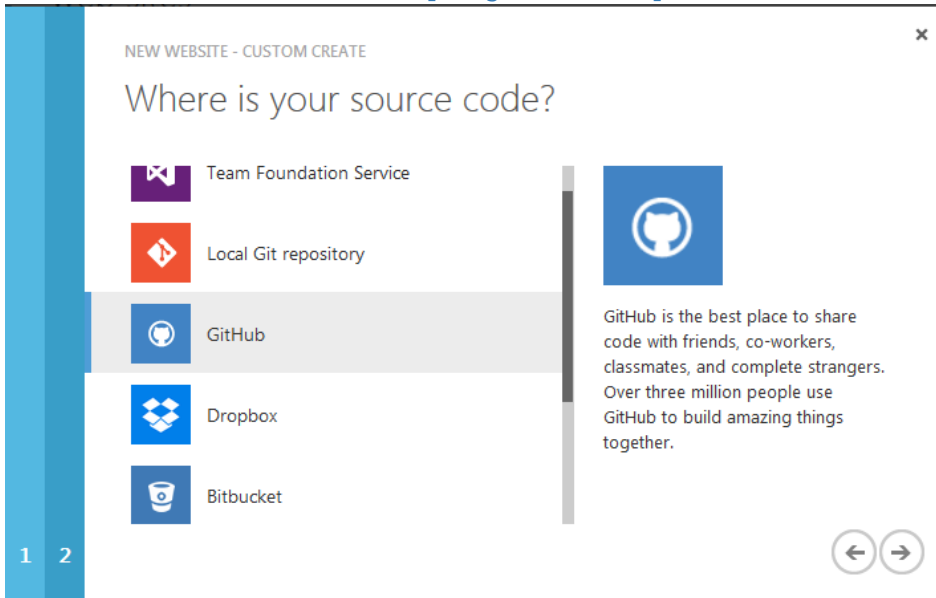

2 3

## Accept name for the database

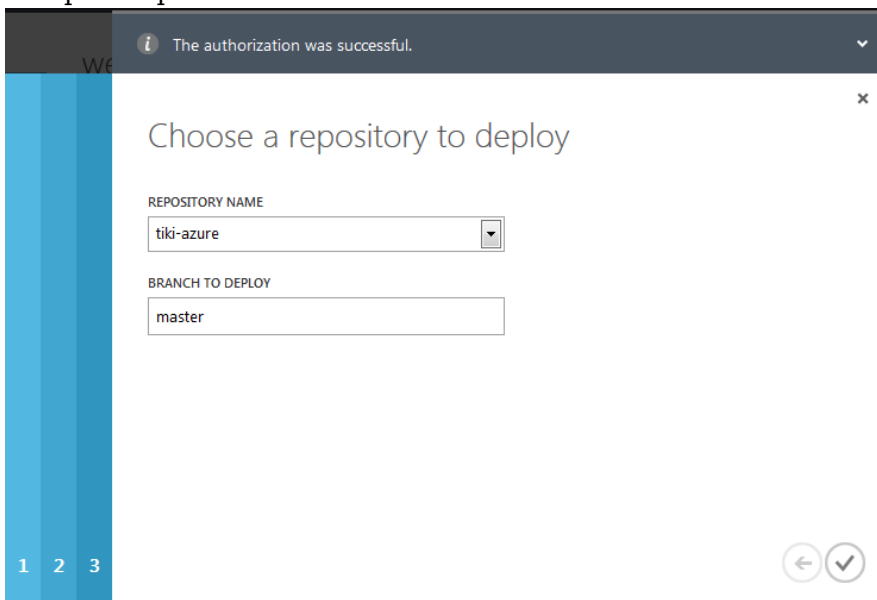

Indicate source for the code

Pick Github You should fork <https://github.com/lphuberdeau/tiki-azure> and use this.

Authenticate with Github

and pick repo

See the dashboard

NAME	STATUS	SUBSCRIPTION	LOCATION	MODE	URL
mytikitest	Running	Free Trial	North Central US	Free	mytikitest.azurewebsites.net

## Tiki side configuration

Set MySQL SSL connection

It is recommended to use an SSL connection when using cloud based databases. See [MySQL SSL](#) for details

## Troubleshooting

Deployment failed

**DEPLOYMENT FAILED:** Thursday, June 13, 2013 11:37 AM
