## To access

Click the **Log in** icon on the [Admin Panel](#)

or Access <http://example.org/tiki-admin.php?page=workspace>

---

## Option

Workspace UI

Namespace

---

## Description

Combines multiple site features to create a workspace experience for workgroups.

Enable namespaces feature for wiki pages.

**Default**

Disabled

Disabled

# Option

## Namespace separator

Force all non-namespace page links to the same namespace

Perspectives

Category

## Description

Select the character, symbol, or text to use as the namespace separator.

If the current page is in a namespace, all links without a namespace will have it added automatically

Permits overriding of preferences.

Site-wide content category system. Items of different types (wiki pages, articles, tracker items, etc.) can be categorized. Categories can have permissions to control content access
