```

Shows an icon with the number of and a link to user notifications

[Go to the source code](#)

*Preferences required:* monitor\_enabled

### Parameters

*no parameters*

### Example

In the example below we pass in a wiki page the module Top Blog Posters through the plugin module. So, this code:

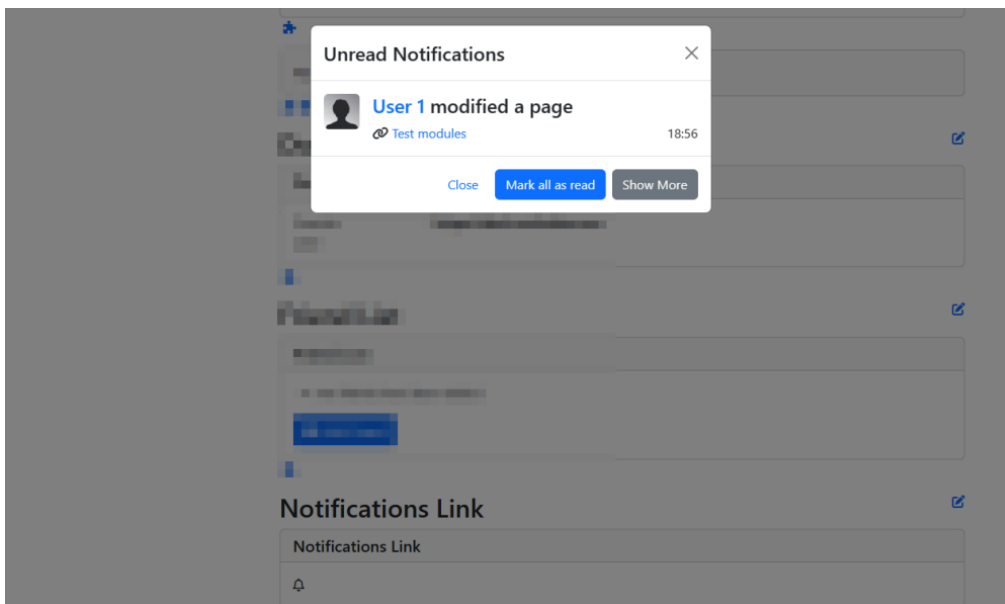

```
{module module="notificationlink"}
```

Would produces on this site:

### Notifications Link

Then if you click on the bell icon, you will see notifications:
