Module terminology

This is highly experimental and (for now) only useful for developers who want to contribute to Tiki.

This module is used for:

http://profiles.tiki.org/Collaborative_Multilingual_Terminology

Parameters

Support for multilingual terminology

Go to the source code
Preferences required: terminology_profile_installed

Parameters	Accepted Values	Description	Default	Since
`root_category`		All terms will automatically be put in that category. Note that the category must already exist. Defaults to 'Term'
